Revised Draft Generic Import Risk Analysis Report for Prawns and Prawn Products

Corrigendum

This corrigendum is for the above report issued in November 2006.

Last updated 20 June 2007.

Part B: Risk Assessment Report

Page iv
Include ‘ICS Integrated Cargo System’ between ‘ICON’ and ‘ICTV’.
Include ‘RDS runt-deformity syndrome (RDS)’ between ‘QLD’ and ‘RLO’.

Page 97
Paragraph 2, Line 2: replace ‘crayfish, as well as polychaete worms used for crustacean broodstock is reported to be susceptible to natural infection with WSSV.’ with ‘crayfish are reported to be susceptible to natural infection with WSSV and feed for crustacean broodstock such as polychaete worms have been identified as mechanical carriers.’

Page 159
Third dot point under ‘Conclusions’: replace ‘IMNV’ with ‘NHPB’

Page 174
Paragraph 3, Line 1: replace ‘in to’ with ‘into’.

Page 181
Paragraph 1.2, first dot point: after ‘country’ insert ‘or zones’.

Page 182
Sub paragraph commencing ‘* Note that testing for a pathogenic agent… ’ after ‘country’ insert ‘or zones’.

Page 209

Page 221
Paragraph 3, Line 1: insert sentence ‘In a 2004 study of farmed L. vannamei located in the Pernambuco State of Northern Brazil, 9 out of 11 farms sampled had at least one pond test positive for IMNV (Pinheiro et al. 2007)’
Paragraph 3, line 1: delete ‘or farmed’.
