

Australian Government Department of Agriculture and Water Resources - Veterinary Health Certificate for dogs exported from mainland Australia to Norfolk Island.

To be completed by a registered veterinarian. A separate certificate must be completed for each dog. Please see additional notes on page 4 for further information.

1. Animal details

Name of animal:	
Date of birth/Age:	
Sex: <i>(mark with an X in the appropriate box)</i>	<input type="checkbox"/> Male <input type="checkbox"/> Neutered male <input type="checkbox"/> Female <input type="checkbox"/> Neutered female <input type="checkbox"/> Pregnant female
Microchip number(s):	
Site(s) of microchip(s) in the animal:	
Scheduled date of export:	
Scheduled flight number:	

2. Test / treatment record

External parasite treatments	Treatment date <i>(dd/mm/yyyy)</i>	Product name, active ingredient(s), dose rate
The dog was treated for external parasites by a registered veterinarian with a product that effectively kills ticks and fleas on contact within 5 days of the scheduled time of export. The product must be protective for the entire period from treatment until export.		
Internal parasite treatment	Treatment date <i>(dd/mm/yyyy)</i>	Product name, active ingredient(s), dose rate
The dog was treated for internal parasites by a registered veterinarian with a product effective against nematodes (roundworms) and cestodes (tapeworms) within 5 days prior to export.		
Canine heartworm testing (if dog is over 6 months of age)	Sample collection date <i>(dd/mm/yyyy)</i>	Test result
The dog was tested for canine heartworm using an antigen test within 30 days prior to export.		

Canine heartworm treatment (if dog is over 6 months of age)	Treatment date (dd/mm/yyyy)	Product name, dose rate
The dog was treated for canine heartworm by a registered veterinarian within 5 days prior to export with: <ul style="list-style-type: none">• Milbemycin at a rate of 0.5 mg/kg body weight, or• Moxidectin at a rate of 2.0-4.0 mcg/kg body weight, or• sustained release formulation moxidectin (Proheart SR12) at approved dose rate.		
<i>Leptospira icterohaemorrhagiae</i> testing	Sample collection date (dd/mm/yyyy)	Test result
The dog was tested for <i>Leptospira icterohaemorrhagiae</i> antibodies using a microscopic agglutination test (MAT) within 14 days prior to export.		
Vaccinations	Vaccination date (dd/mm/yyyy)	Vaccine
The dog was fully vaccinated, in accordance with manufacturer directions, against canine, parvovirus, canine distemper and canine infectious hepatitis.		
Examination of the dog	Date of exam (dd/mm/yyyy)	
The dog was examined within 5 days before export and found to be free from ticks, fleas, and clinical signs of infectious or contagious disease.		

3. Endorsement

I certify that, after due enquiry, all the information provided in this Veterinary Health Certificate is true and

- the microchip number listed on all documentation matches the microchip number scanned in the dog described here.
- the dog was not under quarantine restriction at the time of export.
- all vaccines and external parasite treatments will be valid, according to the manufacturer’s directions, at the scheduled time of export.
- all treatments, collection of specimens and examinations were conducted in Australia by a registered veterinarian.
- the results of canine heartworm and *Leptospira icterohaemorrhagiae* testing were negative.

I certify that I am a registered veterinarian in an Australian state or territory.

-----End of Veterinary Health Certificate -----

Additional Notes:

1. An import permit is not required from the Department of Agriculture and Water Resources, Australia.
2. The veterinary health certificate is to be completed by a veterinarian registered in an Australian state or territory.
3. One veterinary health certificate is required for each animal.
4. A list (not exhaustive) of approved external parasite treatments is available on the department's website: <http://www.agriculture.gov.au/cats-dogs/step-by-step-guides/parasite-treatment>. The animal should be protected for the entire period from treatment until the date of export, therefore re-treatment may be required for products with a re-treatment interval of less than five (5) days.
5. This veterinary health certificate must accompany the animal during transport to Norfolk Island.
6. Any additional requirements that may be stipulated by the Norfolk Island Regional Council (<http://www.norfolkisland.gov.nf/services/environment-and-health/animal-importation>) must be complied with.
7. The exporter must give the Department of Agriculture and Water Resources at least three (3) days' notice of the animal's arrival in Norfolk Island. Notice of arrivals should be made by email (Norfolk.Island@agriculture.gov.au) to the contact officer on Norfolk Island and should include the following information:
 - a. Date and estimated time of arrival
 - b. Air waybill number
 - c. A contact phone number in mainland Australia
 - d. Flight number
 - e. A short description of the cat/dog including the microchip number
 - f. The address at which the animal is to reside in Norfolk Island.
8. A copy of the completed veterinary health certificate must be emailed to the contact officer on Norfolk Island at least 24 hours before the date of export.
