

Technology, change, future: Innovation in dairy processing

Fabrizio Jorge

The fundamentals for dairy are strong

Efficient and modern manufacturing

MULTI HUB STRATEGY

Dairy science and innovation

An end-to-end supply chain

Traceability from grass to glass

QR-coded product authentication

Consolidated distribution network

Global reach, global customers

Consumer insights

What does the future look like?

- We need to innovate across our supply chain to optimise our solids to extract value out of every single drop of milk.
- Innovation is key – we cannot keep doing the same thing and expecting different results.
- However, innovation isn't about reinventing the wheel.
- It's about finding new ways of delivering what our customers want, in an efficient way for our business.

Thank you
