Certificate no.

APPENDIX B

Additional certification to be completed when the horse has resided in Hong Kong Special Administrative Region (including Conghua Training Centre) during the 60 days before export from another approved country¹ to Australia

Name of horse: _____ Identification: _____

Breed: _____ Sex: _____ Age: _____

To be completed by the owner / person responsible for the horse

I,, being the owner or representative of the owner of the horse listed above declare that:

1. The horse was continuously resident from to (dates), which is during the 60 days immediately before export to Australia, in Hong Kong at
.....
.....
.....(address/es).

*and the Conghua Training Centre in the People's Republic of China, the use of which has been approved by the Australian Government for horses being exported from Hong Kong.

- a. For all horses (excluding donkeys and mules), excluding geldings and unweaned foals under six months of age:

The horse has not been mated to, or inseminated with semen from, a horse that was, at the time of mating or semen collection, known to be infected with *Taylorella equigenitalis*.

Note: if a horse does not meet this requirement, or has been known to be infected with *T. equigenitalis*, it may be permitted entry subject to an approved method of treatment and testing considered appropriate by the Director of Biosecurity (or delegate).

- b. The horse has not been treated with imidocarb, or other anti-babesial agents active against *Babesia caballi* or *Theileria equi*, during the 12 months before commencement of pre-export quarantine for export to Australia.
- c. The horse has not tested positive in any test for equine piroplasmiasis (*B. caballi* or *T. equi*) for at least 12 months before commencement of pre-export quarantine for export to Australia.

¹ Approved countries are: Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Hong Kong Special Administrative Region, Japan, Italy, Luxembourg, Macau, the Netherlands, New Caledonia, New Zealand, Portugal, Republic of Iceland, Republic of Ireland, Singapore, Spain, Sweden, Switzerland, the United Arab Emirates, the United Kingdom and the United States.

Additional certification to be completed when the horse has resided in an approved country (or countries) other than the exporting country during the 60 days before export.

- d. The horse has not been vaccinated against African horse sickness or Venezuelan equine encephalomyelitis during the 60 days before export to Australia.
- e. * (For US and Canada only, if no premises freedom declared at 2.d) During the 12 months before export, the horse was vaccinated against Eastern and Western equine encephalomyelitis using a registered vaccine.
- f. *(For Japan, Hong Kong Special Administrative Region and Singapore) During the 12 months before export the horse was vaccinated against Japanese encephalitis using a registered vaccine.

* Strike through if not applicable

Signature:

Date:

To be completed by the Official Veterinarian of each country that the horse resided in before the exporting country.

I, (insert name), an Official Veterinarian[#] of the Hong Kong Special Administrative Region hereby certify that:

[#] Official Veterinarian means a veterinarian authorised by the Veterinary Authority of the approved country to perform certain official tasks associated with animal health and/or public health, and inspections of commodities and, when appropriate, to certify in conformity with the provisions of Chapters 5.1. and 5.2. of the World Organisation for Animal Health (OIE) Terrestrial Animal Health Code.

2. During the period noted in point 1, the horse listed above was:

a. continuously resident and free of quarantine restriction in

i. Hong Kong where no clinical, epidemiological or other evidence of glanders occurred during the previous three years and the disease is compulsorily notifiable.

AND

*ii. *the Conghua Training Centre, and no clinical, epidemiological or other evidence of glanders in the Conghua Training Centre has been reported to AFCD during the previous three years or since opening (if less than three years).

b. continuously resident and free of quarantine restriction in

i. Hong Kong where no clinical, epidemiological or other evidence of African horse sickness, dourine, Venezuelan equine encephalomyelitis or vesicular stomatitis occurred during the previous two years and the diseases are compulsorily notifiable.

AND

*ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of African horse sickness, dourine, Venezuelan equine encephalomyelitis or vesicular stomatitis in Conghua Training Centre has been reported to AFCD during the previous two years before export to Australia or since opening (if less than two years).

- c. continuously resident and free of quarantine restriction in
 - i. Hong Kong where no clinical, epidemiological or other evidence of Eastern or Western equine encephalomyelitis occurred during the previous two years.

AND

*ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of Eastern or Western equine encephalomyelitis in Conghua Training Centre has been reported to AFCD during the 60 days before export to Australia.

- d. As declared at point 1. f., during the 12 months before export the horse was vaccinated against Japanese encephalitis using a registered vaccine.
- e. Within 24 hours of export from Hong Kong the horse was thoroughly examined, under the direct supervision of an Official Veterinarian, and no screw-worm-fly infestation was found.
- f. continuously resident and free of quarantine restriction in
 - i. Hong Kong where no clinical, epidemiological or other evidence of surra (*Trypanosoma evansi*) occurred (in any species) during the previous 12 months.

AND

*ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of surra (*Trypanosoma evansi*) in Conghua Training Centre has been reported to AFCD during the 60 days before export to Australia.

- g. After due inquiry, the horse did not reside on any premises in
 - i. Hong Kong where clinical, epidemiological or other evidence of rabies occurred during the previous 12 months.

AND

* ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of rabies in Conghua Training Centre has been reported to AFCD during the 60 days before export to Australia.

- h. After due inquiry, the horse did not reside on any premises in
 - i. Hong Kong where clinical evidence of Borna disease occurred during the previous 90 days.

AND

*ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of Borna disease in Conghua Training Centre has been reported to AFCD during the 90 days before export to Australia.

- i. After due inquiry, the horse did not reside on any premises in
 - ii. Hong Kong where clinical, epidemiological or other evidence of contagious equine metritis, epizootic lymphangitis, equine infectious anaemia, equine piroplasmosis or Lyme disease occurred during the previous 60 days.

AND

* ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of contagious equine metritis, epizootic lymphangitis, equine infectious anaemia, equine piroplasmosis or Lyme disease in Conghua Training Centre has been reported to AFCD

during the 60 days before export to Australia.

- j. After due inquiry, the horse did not reside on any premises in
- i. Hong Kong where clinical, epidemiological or other evidence of anthrax, equid herpesvirus-1 (abortigenic and neurological strains), equine influenza or equine viral arteritis occurred during the previous 30 days.

AND

* ii. the Conghua Training Centre, and no clinical, epidemiological or other evidence of anthrax, equid herpesvirus-1 (abortigenic and neurological strains), equine influenza or equine viral arteritis in Conghua Training Centre has been reported to AFCD during the 30 days before export to Australia.
