

Comparison guide for approved arrangement class 19.2: automatic entry processing for commodities from version 9.0 to version 9.1

To assist with understanding the transition from the current requirements and conditions for class 19.2: automatic entry processing for commodities (AEPCOMM) version 9.0 to requirements and conditions for class 19.2: automatic entry processing for commodities (AEPCOMM) version 9.1, the department has provided a table showing side-by-side comparisons of the current requirements and conditions and the new requirements and conditions.

Where no change has occurred to the conditions and requirements they are not listed.

Table 1: comparison of Operating conditions

Version 9.0 broker class 19.2 requirements and conditions		Version 9.1 broker class 19.2 requirements and conditions	
Version 9.0	Operating Conditions	Version 9.1	Operating Conditions
Condition 18	Accredited persons must enter the treatment provider's AQIS entity identifier (AEI) in the AEI field in the ICS, where a consignment has been treated offshore by an offshore registered treatment provider and the certified treatment details meet BICON conditions for the relevant biosecurity concern (e.g. treatment rates for BMSB are different to treatment rates for commodity concerns). For information on entering the AEI number please see Entity Identifier webpage .	Condition 18	Accredited persons must enter the treatment provider's AQIS/agriculture entity identifier (AEI) in the AEI field in the ICS where a consignment has been treated by an offshore treatment provider, to address BICON conditions for the relevant biosecurity concern (i.e. non-commodity and/or hitchhiker pests). AEI must be entered in accordance with Entity identifier webpage .
