

Supplementary Form C

- Threatened species & Ecological Communities
- Migratory species
- Listed marine species

(use Form A for Cetaceans)

Use this supplementary form if you are applying for a permit to kill, injure, take, trade, keep or move a listed species or ecological community, a listed migratory species, or a listed marine species in a Commonwealth Area. You will also need to complete "The General Permit Application Form".

If you are proposing to take or send specimens out of Australia it is likely that you will also need an export permit. Import permits may also be necessary for taking specimens into an overseas country. For more information on imports and exports contact the Wildlife Trade Assessments Section on 02 6274 1900 or email wps@awe.gov.au.

Please note that it is a requirement under subsection 200(3) of the Environment Protection and Biodiversity Conservation Act 1999 that details of this application (which may include the applicant's name) be provided to persons or bodies registered with the Department of Agriculture, Water and the Environment under section 266A of the Act, and to whom notice of applications is to be given, for the purpose of inviting submissions from those persons or bodies regarding permit applications.

1 Under which section(s) of the EPBC Act are you applying for this permit?

It will help you complete your application if you know which list in the EPBC Act the affected species/ecological community appears on. Search the lists at: www.environment.gov.au/cgi-bin/sprat/public/sprat.pl

Please note some species appear on more than one list. For example, the Green Turtle Chelonia mydas is a listed threatened species, a listed migratory species, and a listed marine species.

Select all that apply

Section 201 — Listed threatened species and ecological communities	\leq
Section 216 — Listed migratory species	
Section 258 — Listed marine species	

On the next page list details of species or ecological communities that will be affected by the action. Use the following codes to enter details in columns 3, 4 and 5.

Column 3 Conservation status of threatened species or ecological communities under EPBC Act

EW Extinct in the wild

EX Extinct

CE Critically endangered

EN Endangered

VU Vulnerable

CD Conservation dependent

Column 5 Type of effect

DE Death

IN Injury

TR Trading

TA Taking

KE Keeping

Page 2 of 8 21/05/2020

Details of species or ecological communities that will be affected by the action.

Common name of listed species/ecological communities, listed migratory species, or listed marine species.	Scientific name of species Common and scientific names are available at the Department's website: www.environment.gov.au/cgi-bin/sprat/public/sprat.pl		Estimated number that will be affected. For ecological communities, provide estimate of the affected area	Type of effect
See attached LEG-CO.General Permit Application Supporting	Methods for list of species	1		

Where the project is of less than 1 km2 in size, provide the location as a single pair of latitude and longitude references. Latitude and longitude references should be used instead of AMG and/or digital coordinates.

Locality:

Latitude:	degrees:	minutes:	seconds:
Longitude:	degrees:	minutes	seconds:

Where the project area is greater than 1 km², or any dimension is greater than 1 km, provide additional coordinates to enable accurate identification of the location of the project area.

Shoalwater Bay Training Area and Shoalwater Bay Training Expansion Area (Central Coordinates: -22.57045, 150.18664), Greenvale Training Area (Central Coordinate: -19.32423, 144.84379)

Attach a map to show the boundaries of the area in which the action will be conducted.

Page 3 of 8 21 May 2019

- **3** Provide an attachment describing the action addressing the following points.
 - A. The objectives and purposes of the action;
 - B. The equipment and methods used;
- What are the likely short and long term impacts of the proposed action on the species or the ecological community?

None. Samples will be taken for identification purposes only. Samples will compromise representative part of plants (not whole plants), scats, photographs (from remote cameras and drones), call recordings (from remote recorders*). *See Methods Statement.

Describe the steps that will be taken to minimise impacts on the listed species/ecological community, including contingency plans in the case of events that may adversely affect members of the species/ecological community.

No animals will be trapped, injured or taken whole. Hair samples will be taken using hair tubes with sticky tape. The only other evidence of animal presence will be taken from direct observation, remote detection (cameras, call detectors), signs and seats.

Plant specimens will only be taken from individuals with sufficient material to sustain the loss. Two samples will be taken from most species (if available) for submission to the Queensland Herbarium for identification and retention. One sample only will be taken from endangered species. No whole plant specimens will be taken, and minimal reproductive material taken to ensure no impairment of the species regeneration potential.

These relatively benign methods will not impact adversely on any threatened species or ecological communities.

- Attach a description of any research relevant to the affected species or communities that will be carried out in the course of or in conjunction with the proposed action, including:
 - A. a copy of the research proposal;
 - B. the names of the researchers and institutions involved in or supporting the research; and
 - C relationship of the researchers to the permit applicant, including any funding being provided by the permit applicant.
- 7 Will the action involve invasive techniques?

No Go to next question

Yes If permit relates to mammals, birds, reptiles or amphibians, attach evidence that the proposed methods have been approved by an independent Animal Ethics Committee (this may include a State or Territory ethics committee, even if the action is conducted in a Commonwealth area).

A permit can only be issued under one of the following criteria: the action

- will contribute significantly to the conservation of a listed species/ecological community (go to Question 8); or
- will be incidental to, and not the purpose of the action (go to Question 12); or
- is of particular significance to indigenous tradition (go to Question 15); or
- is necessary to control pathogen(s) (go to Question 18).
- Are you applying on the basis that the <u>action will contribute</u> significantly to the conservation of a listed species/ecological community?

No Go to 12

Yes Go to next question

Why do you believe that the action will contr

Why do you believe that the action will contribute significantly to the conservation of listed species/ecological communities, listed migratory species or listed marine species?

The surveys will allow Department of Defence to determine the distribution of threatened species and ecological communities (listed above) (within the areas provided in attached maps), providing information that is critical for planning training exercises, infrastructure development proposals and conducting land management activities (i.e. fire management, targeted conservation management of species and/or communities). Inadequate knowledge of the location, extent and condition of threatened species and ecological communities could lead to losses of individuals, populations and/or habitat

Page 4 of 8 21 May 2019

10	Will the proposed action implement the recommendations of any recovery plan or wildlife conservation plan in force for the species or ecological community that may be affected by the action? Commonwealth recovery plans that are in force are available at www.environment.gov.au/biodiversity/threatened/recovery-list-common.html Commonwealth wildlife conservation plans that are in force are available at		
	www.environment.gov.au/biodiversity/migratory/publications/sh orebird-plan.html		
	State and territory recovery plans are available from state and territory environmental agencies.	12	Are you applying on the basis that the impact of the <u>action will</u> <u>be incidental to, and not the purpose of, the action?</u>
	No Go to next question		No Go to 15
	Yes Describe how this will be implemented.		Yes Oo to next question
		13	Why do you believe that the impact of the action will be incidental to and not the purpose of the action?
11	Will the proposed action respond directly or indirectly to recommendations of any national or international organisation		The impact of the action (sampling for species identification) is incidental to any future purpose.
	responsible for management of the affected species?		
	No Go to next question Yes Describe how the proposed action will respond.		Why do you believe that the taking of the action will not adversely affect the:
		i. ii.	survival or recovery in nature of the species or ecological community? conservation status of a listed species or ecological community?

Page 5 of 8 21/05/2020

The action will not take or harm any species, and therefore not adversely affect the survival or recovery of any species or ecological community, or affect their conservation status. Indeed the action will likely improve these outcomes.	ii. conservation status of the listed species or ecological community.
Are you applying on the basis that the action is of particular significance to indigenous tradition? No Go to 18 Yes Go to next question Explain why do you believe that the proposed action will be of	Are you applying on the basis that the <u>action is necessary to control a pathogen(s)</u> , and is conducted in a way that will, as far as is practicable, keep to a minimum any impact on listed species/ecological communities, listed migratory species or listed marine species?
particular significance to indigenous tradition?	No Continue to Payment Section Yes Oo to next question 19 Why do you believe that the action is necessary for the control of pathogen(s)?
Why do you believe that the proposed action will not adversely affect the:

survival or recovery in nature of the listed species or

Page 6 of 8 21/05/2020

If you have answered NO to Questions 8, 12, 15 and 18, it is unlikely that a permit can be issued under the EPBC Act.

21 Fees

The following fees apply:

- permits relating to listed threatened species or ecological communities - \$100
- permits relating to listed migratory species nil
- permits relating to listed marine species nil

Please note that exemption from fee payment may apply under circumstances as set out in EPBC Regulation 18.04.

Method of Payment

To make a payment, the department's preferred methods of payment are by credit card, bank cheque or by electronic funds transfer (EFT). A tax invoice can be arranged prior to payment, but you should allow up to five business days to process the transaction.

Please contact EPBC.permits@awe.gov.au if you would like to request a tax invoice.

Credit Card

Please submit your permit application to the Department to obtain a permit reference number. This reference number will be required when you contact the Department to make the payment.

Contact the Collector of Public Money (Accounts) on (02) 6274 1151

EFT Payments

EFT Payments can be made to:

BSB: 092-009

Bank Account No. 115859

Amount: See applicable fee in section 21 above.

Account Name: Department of Agriculture, Water and the

Environment

Department address: GPO Box 858, Canberra ACT 2601

Bank: Reserve Bank of Australia

Bank Address: 20-22 London Circuit Canberra ACT 2601 Description: Part 13 permit application fee [Include name of

project]

Reference: [include Permit reference number (if known)]

23 Attachments

Indicate below which documents are attached.

Description of proposed action

See question 3

Description of relevant research

See question 6

Evidence of approval of invasive techniques

See question 7

Details for payment of fee

See question 22

24 Declaration

I declare that the information contained in this supplementary form is correct to the best of my knowledge.
