

Supplementary Form B: Non-Commercial - Education

This form should be completed if you ticked the 'Non-commercial - Education' box in answer to the purpose of export/ import question in the Permit Application form. If so, please complete this form and return it, along with the Permit Application form, to the Department of Sustainability, Environment, Water, Population and Communities.

Information on the requirements for approval of permits for the purpose of non-commercial education is available at <http://www.environment.gov.au/biodiversity/wildlife-trade/sources/non-commercial/index.html>

Applications that are incomplete or contain insufficient information cannot be assessed. Delays will occur whilst further information is sought from the applicant.

If there is insufficient space on this form to fully address any of the questions please attach additional pages.

1. Title of education or training project

- 2.** Have you previously received an import/export permit under Part 13A of the *Environment Protection and Biodiversity Conservation Act 1999* for the **same taxon** and **same education project**?

No

☐

Go to next question

Yes

☐

Include previous import/export permit numbers

Go to question 5

- 3.** Will the specimens to be imported/exported, be used for educating or training enrolled or registered students?

No

☐

Approval of your application will not be possible under the education provisions of the Act. Please refer to <http://www.environment.gov.au/biodiversity/wildlife-trade/sources/non-commercial/index.html> to determine if you can apply under the other provisions of the Act.

Yes

☐

Go to next question

- 4.** Attach details of:

- the student enrolment or registration arrangements for the institution; and
- how the proposed education project relates to the education or training program of the institution; and
- the objectives and methodology of the project.

5. Does the specimen come from a captive animal or an artificially propagated plant?

The regulations state that if possible, the specimen should come from a captive animal or artificially propagated plant.

No ☐ Please provide rationale for not using captive animals or artificially propagated plants (use a separate page if necessary) and **go to next question.**

Yes ☐ **Go to next question**

6. Is the specimen needed for conservation breeding or propagation by the exporting country?

No ☐ If the specimen is a live animal (including viable reproductive material), include a statement on how it was determined that the exporting country does not require the specimens (if necessary on a separate page).
For example, relevant census or plan prepared by a regional zoological association does not list any institution in the exporting country as desiring the species for conservation breeding.

Go to next question

Yes ☐ **Approval of your application will not be possible. (The regulations require that the specimen is not needed for conservation breeding or propagation by the exporting country.)**

7. Is the specimen from a species listed as threatened (excluding the Conservation Dependant category) under section 178 of the EPBC Act?

The list of EPBC threatened species is at <http://www.environment.gov.au/biodiversity/threatened/>

No ☐ **Go to question 9**

Yes ☐ **Go to next question**

8. Has a recovery plan been prepared for this species? A list of recovery plans is at: <http://www.environment.gov.au/biodiversity/threatened/recovery.html>

No ☐ **Go to next question**

Yes ☐ Provide evidence that the export is not inconsistent with any recovery plan and **Go to next question**

9. Does the education or training involve the use of live animal(s)?

No ☐ **Go to 16**

Yes ☐ **Go to next question**

10. Will the animal(s) be held in a way that is known to result in minimal stress and risk of injury to the animal?

The regulations require that the animal is held in a way that is known to result in minimal stress and risk of injury to the animal.

No ☐ **Permit cannot be issued**

Yes ☐ **Go to next Question**

Note: For holding of live mammals, reptiles, birds and amphibians additional information will be required when completing 'Supplementary Form G: Live Animal Imports/Exports'

11. Does the education or training involve the killing of the animal(s)?

No ☐ **Go to question 13**

Yes ☐ **Go to next question**

12. When an animal is killed, will it be done in a way that is generally accepted to minimise pain and suffering?

The regulations require that if an animal is killed it will be done in a way that is generally accepted to minimise pain and suffering.

No ☐ **Permit cannot be issued.**

Yes ☐ Provide evidence that the animal(s) will be killed in a way that is generally accepted to minimise pain and suffering and **Go to next question**

Note: In the case of live vertebrates this should include evidence of animal ethics committee approval (or equivalent). If live invertebrate, include a brief description of how the animals will be killed. Refer to any applicable guidelines that will be followed.

13. Is the application for the export of a live koala, platypus, wombat, Tasmanian devil or a species listed as threatened (excluding the Conservation Dependent category) under section 178 of the Act?

No ☐ **Go to question 16**

Yes ☐ The exporter, importer and the Department need to enter into an agreement (Ambassador Agreement) about the treatment and disposal of the animal and any progeny of the animal. **Go to next question**

14. Is there currently in place an Ambassador Agreement between the exporting and importing institutions and the Department relating to the species to be used in the education or training project?

No ☐ **Go to next question**

Yes ☐ Include date agreement came into effect (the date signed by the Department)

Go to question 16

15. Are the exporting and importing institutions prepared to enter into an Ambassador Agreement with each other and the Department for the species to be used in the education or training project?

No ☐ **The issue of a permit will not be possible**

Yes ☐ Applicant should contact the Department, to get a copy of the standard Ambassador Agreement. This application can be submitted to the Department prior the agreement being signed, but a permit cannot be issued until all parties have signed the agreement.

16. Attach copies of any other approvals or permits relating to the specimens

Include (where appropriate):

Ethics committee approvals
State/Territory holding, collection, import and export permits
CITES permits

17. Declaration

I declare that during and after the education or training project, I/my organisation will not allow the specimen, or progeny or products of the specimen, to be used for commercial purposes.

Name of **recipient** or authorised person (if applicant is an organisation)

Position within organisation (if applicable)

Organisation (if applicable)

Signature of **recipient** or authorised person

Date signed
