ANNUAL REPORT 2018/19

OVERVIEW

Electronic Product Stewardship Australasia (EPSA) and Sims Recycling Solutions (SRS) are part of Sims Metals Management, one of the largest tradeable scrap metal companies in the world.

EPSA is wholly owned by SRS and an approved co-regulatory arrangement to deliver the outcomes required by the Product Stewardship (Televisions and Computers) Regulations 2011. SRS is the global leader in electronic recycling services and is the main strategic partner of the EPSA arrangement.

Established in Sydney in 1917, the Sims Group expanded its e-waste services offering into Australia in 2005 and today operates from fully compliant sites in Sydney, Melbourne and Brisbane. Our extensive global reach and experience has enabled the business to develop innovative technologies that separate and track all liberated materials (especially hazardous material) in an efficient and effective manner.

We aim to be the world's safest and most responsible recycling company by developing a zero harm workplace for our employees and all visitors to our facilities: being an exemplary member of the communities in which we operate and being responsible stewards of the environment. As industrial operators with many global facilities we respect the environment and support the communities in which we work. As recyclers we are firmly committed to operating under the umbrella of sustainability.

Our core values of Safety, Integrity, Respect, Transparency Excellence and Social Responsibility determine who we are and are the foundations of everything we do.

Our members are extremely important to the scheme and I would like to take this opportunity to thank all our valued members for their loyal support and encouragement during FY19. Without their membership the scheme would not be possible.

SRS is the main strategic partner and owner of EPSA providing electronic recycling services, collections and logistics support, data destruction and online reporting. Our facilities operate to best industry and government standards and we are the leading industry

voice in driving best practice within the electronic recycling industry. Our volume continues to be recycled to the highest of standards through our main strategic partner SRS. Where appropriate SRS strategically engages with other recycling partners all of which are fully audited and compliant to the required AS/NZS 5377 standard. All strategic partners report through SRS who in turn reports to EPSA on the outcomes of the scheme.

The costs associated with fully compliant outcomes is real and the cost of delivering such is coming into conflict with the price offered in the market to secure members to arrangements. Corners will be cut in the future and we will continue to see more illegal exports of products off-shore.

We continue to develop our communication channels with the public and will continue to do so in the coming years. We have increased our marketing and advertising campaigns through local media, Facebook, LinkedIn whilst strengthening our team both in numbers and experience which has enabled us to secure longer term valued partnerships.

Looking ahead, volume is becoming increasingly difficult to source as a result of illegal offshore shipments of e-waste, longer distances to travel etc. However, EPSA remains positive and determined to deliver fully compliant and cost effective outcomes for its members.

We all too often forget that this is a recycling scheme with the aim of diverting e-waste from landfill whilst maximizing the material recovery from all commodities liberated from the process. We look forward to the challenges in FY20.

OUR PERFORMANCE IN DETAIL

The three main outcomes of the scheme are to meet the recycling target, deliver a recovery rate of 90% and provide reasonable access.

RECYCLING TARGET – ACHIEVED

RECOVERY RATE – ACHIEVED

▲ INITIAL RECOVERY RATE

99.73% DIVERTED FROM LANDFILL AFTER INITIAL PROCESSING

▲ FINAL RECOVERY RATE

95.28% AFTER REMOVAL OF ALL DOWNSTREAM LOSSES & WASTE TO ENERGY

▲ LIBERATED MATERIALS

ZERO

REPORTABLE OH&S INCIDENTS

REPORTABLE ENVIRONMENTAL INCIDENTS

WHOLE UNITS EXPORTED

WHOLE UNITS LANDFILLED

WHOLE UNITS FOR REUSE

UNITS IN STORAGE (EXCLUDING AT RECYCLER)

▲ COUNTRY OF DESTINATION

▲ NON-RECOVERY OUTCOMES

OH&S AND ENVIRONMENT

We aim to be safe and responsible recyclers by developing a zero harm workplace for both employees and visitors to our facilities. We are also responsible stewards of the environment.

SIMS Recycling Solutions is the strategic partner and main service provider to EPSA and can report as follows –

ZERO REPORTABLE OH&S AND ENVIRONMENTAL INCIDENTS

65

BLL testing

DAILY

Toolbox talks

07

Minor injuries

72

Internal audits

151

Training hours

Conducted 12 audits of downstream partners, including focus material

Have had no Loss of Time Injuries (LTI) in FY19

Conducted over 7100 safety conversations

Conducted 22 separate drug and alcohol tests across SRS sites

Identified 46 potential hazards

Completed 264 corrective actions
