

# Full breakdown of levy and export charge rates

## How levy and export charge rates are set

Levy and export charge rates are set by Australian primary industries that choose to invest in the levy and export charge system. The rates are established under legislation.

Levies and export charges help to pay for:

- biosecurity preparedness
- emergency plant pest and animal disease responses
- marketing
- research and development
- residue testing.

You can use the tables to check the amount of levy or export charge allocated to each activity.
