2013 WHC decision (37 COM 7B.10)	Progress since June 2013	Status
4. Managing development in Gladstone Harbour and on Curtis Island	• The Independent Review of the Port of Gladstone was completed and its reports were released in two stages (July and November 2013). Both the Australian and Queensland governments have agreed to consider the review's proposed principles for port optimisation in planning for future port development and operations in the Great Barrier Reef World Heritage Area.	On track
	• The Gladstone Healthy Harbour Partnership was launched and implemented. Its intention is to bring community, industry, science, government, statutory bodies and management together to maintain and improve the health of Gladstone Harbour.	
	• The draft North-East Shipping Management Plan was released for public comment. The plan sets out Australia's intentions to enhance ship safety and environmental protection and specifically considers further measures to reduce and manage shipping-related risks to the Outstanding Universal Value of the GBRWHA.	
5. Water quality	• The Reef Water Quality Protection Plan 2013 (Reef Plan) was released, guided by a revised Scientific Consensus Statement.	On track
	• The 2011 Reef Plan Report Card was released, showing continued progress towards water quality targets.	
	• The Australian and Queensland governments reaffirmed their commitment to the Reef Plan in December 2013.	
6a. No development to impact individually or	• No developments that would have an unacceptable impact on the Outstanding Universal Value of the property have been approved and all decisions made since the release of the draft strategic assessments have been consistent with those assessments.	On track
cumulatively on the Outstanding Universal Value of	• Projects referred and assessed under the <i>Environment Protection and Biodiversity</i> <i>Conservation Act 1999</i> (EPBC Act) explicitly incorporate Outstanding Universal Value into their decision-making framework.	
the property	• Any development proposal that could impact on the Great Barrier Reef will only be approved with the most robust conditions that ensure high environmental standards and a net benefit to the property, including protection of Outstanding Universal Value and integrity.	
6b. No port development	• No new port developments or associated port infrastructure projects have been approved outside existing or long-established major port areas in the Great Barrier Reef Region.	On track
outside existing and long-established port areas	• The Draft Queensland Ports Strategy, released in October 2013, proposes to concentrate port development within existing major ports and introduce a statutory requirement for port master planning.	
	• Outside the long-established major ports, the Queensland Government will also prohibit capital dredging for the development of additional deepwater port facilities for the next 10 years within the GBRWHA.	
6c. Ensure legislation remains strong and adequate to maintain and enhance Outstanding	• Development proposals considered under national and state laws are assessed with enhanced consideration and understanding of the Outstanding Universal Value of the GBRWHA. A suite of products has been produced, including draft EPBC Act Referral Guidelines for the Outstanding Universal Value of the Great Barrier Reef World Heritage Area.	On track
Universal Value	• Australia is working to deliver a single streamlined process for environmental approvals, maintaining high environmental standards.	
7. Overall protection and management of the property	• Australia continues to make substantial progress in implementing the World Heritage Committee decisions and mission recommendations and is committed to corrective action to maintain the Outstanding Universal Value and integrity of the Great Barrier Reef World Heritage Area.	On track
	• A strong foundation of existing protection and management of the property remains firmly in place and continues to be built upon.	
	• The Great Barrier Reef Marine Park Authority is preparing the Great Barrier Reef Outlook Report 2014 for release mid to late 2014.	
8. Submit 2014 State Party Report by 1 February 2014	 The 2014 State Party Report has been completed. The World Heritage Committee has been notified of all proposed developments through regular reports to the World Heritage Centre. 	Complete
	 A further State Party Report will be submitted in 2015.
