

Australian Government Department of Agriculture - Veterinary Health Certificate for cats exported from mainland Australia to Norfolk Island

To be completed by a registered veterinarian. A separate certificate must be completed for each cat. Please see additional notes on page 3 for further information.

1. Animal details

Name of animal:	
Date of birth/Age:	
Sex: <i>(mark with an X in the appropriate box)</i>	<input type="checkbox"/> Male <input type="checkbox"/> Neutered male <input type="checkbox"/> Female <input type="checkbox"/> Neutered female <input type="checkbox"/> Pregnant female
Microchip number(s):	
Site(s) of microchip(s) in the animal:	
Scheduled date of export:	
Scheduled flight number:	

2. Test / treatment record

External parasite treatments	Treatment date (dd/mm/yyyy)	Product name, active ingredient(s), dose rate
The cat was treated for external parasites by a registered veterinarian with a product that effectively kills ticks and fleas on contact within 5 days of the scheduled time of export. The product must be protective for the entire period from treatment until export.		
Internal parasite treatment	Treatment date (dd/mm/yyyy)	Product name, active ingredient(s), dose rate
The cat was treated for internal parasites by a registered veterinarian with a product effective against nematodes (roundworms) and cestodes (tapeworms) within 5 days prior to export.		
Vaccination	Vaccination date (dd/mm/yyyy)	Vaccine
The cat was fully vaccinated, in accordance with manufacturer directions, against feline enteritis.		

Examination of the cat	Date of exam (dd/mm/yyyy)
The cat was examined within 5 days before export and found to be free from ticks, fleas, and clinical signs of infectious or contagious disease.	

3. Endorsement

I certify that, after due enquiry, all the information provided in this Veterinary Health Certificate is true and

- the microchip number listed on all documentation matches the microchip number scanned in the cat described here.
- the cat was not under quarantine restriction at the time of export.
- all vaccines and external parasite treatments will be valid, according to the manufacturer’s directions, at the scheduled time of export.
- all treatments and examinations were conducted in Australia by a registered veterinarian.

I certify that I am a registered veterinarian in an Australian state or territory.

	Phone number:
	Email contact: (please print clearly)
<p>_____ <i>Signature of registered veterinarian</i></p> <p>Veterinary Board Registration Number:</p>	

-----End of Veterinary Health Certificate -----

Additional Notes:

1. An import permit is not required from the Department of Agriculture, Australia.
2. The veterinary health certificate is to be completed by a veterinarian registered in an Australian state or territory.
3. One veterinary health certificate is required for each animal.
4. A list (not exhaustive) of approved external parasite treatments is available on the department's website: <http://www.agriculture.gov.au/cats-dogs/step-by-step-guides/parasite-treatment>. The animal should be protected for the entire period from treatment until the date of export, therefore re-treatment may be required for products with a re-treatment interval of less than five (5) days.
5. This veterinary health certificate must accompany the animal during transport to Norfolk Island.
6. Any additional requirements that may be stipulated by the Norfolk Island Regional Council (<http://www.norfolkisland.gov.nf/services/waste-and-environment/animal-importation>) must be complied with.
7. The exporter must give the Department of Agriculture at least three (3) days' notice of the animal's arrival in Norfolk Island. Notice of arrivals should be made by email (Norfolk.Island@agriculture.gov.au) to the contact officer on Norfolk Island and should include the following information:
 - a. Date and estimated time of arrival
 - b. Air waybill number
 - c. A contact phone number in mainland Australia
 - d. Flight number
 - e. A short description of the cat/dog including the microchip number
 - f. The address at which the animal is to reside in Norfolk Island.
8. A copy of the completed veterinary health certificate must be emailed to the contact officer on Norfolk Island at least 24 hours before the date of export.
