

# HEAT TREATMENT

Minimum requirements for heat treating sea containers to address the risk of khapra beetle

## This information applies to FCL/FCX containers where...

- ① high-risk plant products are packed into the sea container in a khapra beetle target risk country and exported on or after 12 April 2021.
- ② other goods are packed into the sea container in a khapra beetle target risk country, exported on or after 12 July 2021, and will be unpacked in a rural grain growing area of Australia, or exported on or after 15 December 2021, and will be unpacked in a rural nut growing area of Australia.

Note: The postcode classification 'rural/grain growing' has been updated to 'rural khapra risk'. This classification applies to both rural grain and nut growing areas.

### Containers must be heat treated...

at 60°C or or above

for a minimum of 3 hours

prior to packing the goods in the container

under a sheeted enclosure on a hard & flat surface

with one door open...

& the other door closed

with at least 1 sensor in the hinge of the closed door, in the bottom corner underneath the rubber seal

in accordance with the Heat Treatment Methodology.

ⓘ Containers must be treated within 21 days prior to export from the target risk country.

### Make sure...

You provide a treatment certificate, even if a phytosanitary certificate is provided.

The treatment certificate meets the requirements in BICON and the Heat Treatment Methodology.

You use the treatment certificate template.

### Temperature sensor requirements

For individual 20ft and 40ft sea container treatments, a minimum of 5 temperature sensors must be used to monitor the treatment. The sensors must be positioned:

Sensor number	Sensor position
1	<b>Door hinge of closed door:</b> in the bottom corner of the door hinge, underneath the rubber seal.
2 & 3	<b>Surface:</b> on the coldest surface of the container, away from the heat source.
4 & 5	<b>Free airspace:</b> in the coldest ambient air space, away from the heat source.

### Treatment providers

We strongly encourage you to use a treatment provider that is registered with the department.
