

Incidents resolved by the National Biosecurity Management Consultative Committee (NBMCC) and the National Biosecurity Management Group under the National Environmental Biosecurity Response Agreement (NEBRA) – 1 July 2016 to 30 June 2017

Scientific Name (common name)	Taxon Type	Notifying Jurisdiction	Date notified to NBMCC	Date NBMCC reached Consensus	Comment for NBMG
<i>Gamasolaelaps whartoni</i> (predatory mite)	Mite	NSW	29/08/2016	13/09/2016	Consensus by the NBMCC that <i>Gamasolaelaps whartoni</i> is not nationally significant as defined under the NEBRA.
<i>Holaspulus tenuipes</i> (predatory mite)	Mite	NSW	29/08/2016	13/09/2016	Consensus by the NBMCC that <i>Holaspulus tenuipes</i> is not nationally significant as defined under the NEBRA.
<i>Miomantis caffra</i> (South African mantid)	Insect	VIC	4/04/2016	16/07/2016	Consensus by the NBMCC that <i>Miomantis caffra</i> is not nationally significant as defined under the NEBRA.
<i>Oxalis micrantha</i> (dwarf woodsorrel)	Weed	VIC	8/02/2017	15/03/2017	Consensus by the NBMCC that <i>Oxalis micrantha</i> is not nationally significant as defined under the NEBRA.
<i>Piptochaetium bicolor</i> (stipoid grass)	Weed	VIC	1/12/2016	3/12/2016	Although there was no consensus by the NBMCC on the national significance of <i>Piptochaetium bicolor</i> , no other plants were found at the site where the specimen was collected in 2014. There have been no further detections of this plant and it is not considered to be established or present in Australia.
