

SEA CONTAINER MEASURES FOR KHAPRA BEETLE

Under Phase 6A of the khapra beetle measures, mandatory offshore treatment applies to FCL/FCX* containers where:

- high-risk plant products are **packed** into the sea container in a khapra beetle target risk country and exported on or after 12 April 2021
- other goods are **packed** into the sea container in a khapra beetle target risk country and will be unpacked in a rural grain growing area (rural khapra risk postcode) of Australia and exported on or after 12 July 2021
- other goods are **packed** into the sea container in a khapra beetle target risk country and will be unpacked in a rural nut growing area* (rural khapra risk postcode) of Australia and exported on or after 15 December 2021.

We use information from the Bill of Lading to determine if the container was **packed** in one of these countries, as detailed in the flowchart below. Full details are outlined in the BICON case 'khapra beetle sea container'.

Start here

Has an FCL/FCX* container been packed with:

- high-risk plant products & exported on or after 12 April 2021 or
- any other products & exported on or after 12 July 2021 & is destined to rural grain growing area of Australia (rural khapra risk postcode) or
- any other products & exported on or after 15 December 2021 & is destined to rural nut growing area of Australia (rural khapra risk postcode)?

No

Phase 6A measures don't apply.

- Treatment of container is **not** required.
- Standard import conditions apply (refer to BICON).

Yes

What is the port of loading country (as listed on the Bill of Lading)?

Khapra beetle target risk country

Non-khapra beetle target risk country

What country is the supplier/exporter/consignor/shipper from (as listed on the Bill of Lading)?

What country is the supplier/exporter/consignor/shipper from (as listed on the Bill of Lading)?

Khapra beetle target risk country

Non-khapra beetle target risk country

Khapra beetle target risk country

Non-khapra beetle target risk country

Has a sealing declaration been provided to prove the container was not packed in a khapra beetle target-risk country?

No

Yes

Phase 6A measures apply.

Phase 6A measures don't apply.

Phase 6A measures don't apply.

- Container must be treated offshore within 21 days of export.
- Treatment certificate is required.
- Standard import conditions apply for the goods within container (refer to BICON).

- Treatment of container is **not** required.
- A sealing declaration evidencing the container was not packed in a khapra beetle target-risk country **is** required.
- Standard import conditions apply for the goods within container (refer to BICON).

- Treatment of container is **not** required.
- Standard import conditions apply for the goods within container (refer to BICON).

*The following rural nut growing postcodes apply under Phase 6A for sea containers exported on or from 15 December 2021 (4517, 4518, 4560, 4569, 4858)

**ISO tanks, reefers, flat racks, LCL /FAK and containers that will be shipped as empty containers are excluded from the measures
