

Australian Government

KEEP KHAPRA BEETLE OUT OF AUSTRALIA!

These plant products can be infested with khapra beetle and are not permitted into Australia within unaccompanied personal effects or low value sea and air freight.

Khapra beetle is not present in Australia. It is a highly invasive pest that poses a major threat to Australia's grains industry.

Unaccompanied personal effects or low value sea and air freight arriving in Australia that contain any of these high-risk plant products will be immediately destroyed.

DO NOT send these products to Australia

Rice

Pulses

Wheat

**Powdered herbs,
spices & grains**

Nuts

Beans
