

## List of Approved Ingredients for Pet Food and Supplements for Companion Animals

A biological ingredient is included in this list when the Director of Biosecurity is satisfied that the biosecurity risks associated with the material can be managed to an acceptable level.

Betaine
Bromelain
Charcoal
Citric acid
Coconut water
Coenzyme Q10, ubiquinone, ubiquinol
Cultures of <i>Saccharomyces cerevisiae</i> (or a derivative of a pure culture of <i>S. cerevisiae</i> )
Dyes or colouring agents of animal origin (e.g. carminic acid)
Enzymes (other than enzymes derived from animals or microbial fermentation)
Fish oil (other than salmon oil)
Gelatin - commercially prepared derived from animal tissues (other than ruminant tissues)
Highly processed biochemicals derived from wool grease (including cholesterol, cholecalciferol vitamin D3, lanolin and lanolin alcohols)
Honey and bee products (e.g. bee venom, bee wax, honeycomb, propolis, royal jelly) that are pure and free from extraneous material (e.g. sticks, dead bees) before being added to the product
Inulin
Lecithin (plant-derived)
Natural flavourings, except if manufactured using materials of terrestrial (including avian) animal origin
Organic acids e.g. acetic acids, vinegars
Organic chemicals e.g. alcohols, esters, lactic acid
Papain
Pectins
Plant acids

Plant extracts (other than flours in products that are in a dried or powdered form)
Plant gums e.g. arabic gum
Plant juices
Plant oils e.g. gamma oryzanol
Plant waxes
Purified amino acids (derived from plant material or microbial fermentation)
Purified vitamins (derived from plant material, microbial fermentation or wool grease i.e. vitamin D3/cholecalciferol)
Resins
Seaweed flakes and extracts
Starches and maltodextrin
Sugars and complex carbohydrates e.g. dextrose, fructose, glucose, lactose
Tallow derivatives that are methyl oleate, oleic acid, glycerol or stearates, produced by hydrolysis, saponification or transesterification using high temperature (above 200°C) and pressure
Water – clean and potable
Xanthan gum

Note: Biological materials that are further refined derivatives of ingredients listed above are also considered to be on this list.
