

Australian Government

KEEP KHAPRA BEETLE OUT OF AUSTRALIA!

These plant products can be infested with khapra beetle and are not permitted into Australia through international mail.

Khapra beetle is not present in Australia. It is a highly invasive pest that poses a major threat to Australia's grains industry.

International mail articles arriving in Australia that contain any of these high-risk plant products will be immediately destroyed.

Some exclusions apply for certain products. For further information, visit agriculture.gov.au/bicon.

DO NOT buy these products online from overseas.
Tell family and friends **NOT** to send these products to you.

Rice

Pulses

Wheat

Powdered seeds and grains

Nuts

Beans
