Country Specific Guideline for Malaysia

Part 3 of 3: Sarawak

This guideline has been prepared by the Australian Government and the Malaysian Government. It is intended to assist businesses importing regulated timber products from Malaysia into Australia in understanding the regulatory framework in Malaysia in order for them to carry out their due diligence obligations under the Illegal Logging Prohibition Regulation 2012, which supports the Illegal Logging Prohibition Act 2012.

This version (v1.3) of the Country Specific Guideline for Malaysia was co-endorsed by the Australian Government and Malaysian Government on 12 May 2020.

1 What is required under Australia's Illegal Logging Laws?

Australia's Illegal Logging Prohibition Regulation 2012 (the Regulation) prescribes due diligence for businesses importing 'regulated timber products' and for Australian processors of domestic raw logs. Under the Regulation, importers and processors have to undertake due diligence to minimise the risk of sourcing illegally logged timber.

The due diligence requirements for importers include the following steps:

- Step 1:** Establish and maintain a due diligence system.
- Step 2:** Gather information about the timber in the product that is being imported.
- Step 3:** Assess the risk (using one of the three methods outlined in the Regulation).
- Step 4:** Risk mitigation (if required).
- Step 5:** Keep records.

Further information about the Regulation and the due diligence requirements is available at the Australian Government Department of Agriculture, Water and the Environment website (www.agriculture.gov.au/illegallogging).

2 How to use the Country Specific Guideline (CSG)

The forestry and timber industry in Malaysia is governed by laws, regulations and institutional arrangements in the three regions; Peninsular, Sabah and Sarawak. Therefore, the CSG is divided into three separate parts:

Part 1: Peninsular

Part 2: Sabah

Part 3: Sarawak

This three-part CSG is intended to assist an importer of regulated timber products from Malaysia to Australia to comply with the due diligence requirements of the Regulation.

An importer must gather information about the product in accordance with section 10 of the Regulation, this includes gathering information or evidence contained in this CSG.

Information listed in this CSG is not an exhaustive list of evidence or documentation required to satisfy the due diligence requirements under the Regulation.

The information gathered by applying this CSG, along with any other information gathered in accordance with the Regulation, needs to be assessed in accordance with the processes outlined in section 12 of the Regulation (including considering any other information the importer knows, or ought reasonably to know, but is not contained in the CSG), to identify the risk that a regulated timber product is, is made from, or contains illegally logged timber.

All data included in this document is the most current as available at time of publishing.

2.1 Development of the CSG

The development of the CSG was undertaken by a working group which comprised members from the following Ministries, departments, agencies and councils, and trade associations.

Ministries
<p>Ministry of Primary Industries and Commodities (MPIC)</p> <p>Ministry of Water, Land and Natural Resources (KATS)</p> <p>[Formerly known as Ministry of Natural Resources and Environment (NRE)]</p> <p>Ministry of International Trade and Industry (MITI)</p> <p>Ministry of Urban Development and Natural Resources (MUDeNR), Sarawak</p> <p>[Formerly known as Ministry of Resource Planning and Environment, Sarawak]</p>
Departments, Agencies and Councils
<p>Forestry Department Peninsular Malaysia (FDPM);</p> <p>Sabah Forestry Department (SFD);</p> <p>Forest Department Sarawak (FDS);</p> <p>Malaysian Investment Development Authority (MIDA);</p> <p>Malaysian Timber Industry Board (MTIB);</p> <p>Sarawak Timber Industry Development Corporation (STIDC);</p> <p>Malaysian Timber Council (MTC);</p> <p>Malaysian Timber Certification Council (MTCC);</p> <p>Sarawak Forestry Corporation (SFC); and</p> <p>Harwood Timber Sdn. Bhd. (HTSB).</p>
Trade Associations
<p>Malaysian Panel-Products Manufacturers' Association (MPMA);</p> <p>Malaysian Wood Industries Association (MWIA);</p> <p>Malaysian Furniture Council (MFC);</p> <p>Association of Malaysian Bumiputera Timber and Furniture Entrepreneurs (PEKA);</p> <p>The Timber Exporters' Association of Malaysia (TEAM);</p> <p>Malaysian Wood Moulding and Joinery Council (MWMJC);</p> <p>Malaysia Pulp and Paper Manufacturers Association (MPPMA);</p> <p>Sarawak Timber Association (STA);</p> <p>Sabah Timber Industries Association (STIA); and</p> <p>Timber Association of Sabah (TAS).</p>

The CSG has been subjected to several consultations with relevant stakeholders groups in Malaysia at national and regional levels.

Malaysia and Australia have agreed in bilateral discussions that the CSG forms the basis for compliance with the due diligence requirements as set out in the Regulation.

3 Scope of the CSG for Malaysia

This CSG provides detailed information on the control of pathways for timber harvested and then processed/ manufactured in Malaysia and informs Australian importers of what is considered legal timber. It is also only applicable for timber products with a Malaysian origin of harvest, directly exported from Malaysia to Australia.

3.1 Timber harvested outside of Malaysia

There may be timber, forest products or products which contain timber, wholly or in-part, which was harvested in another country, before it was imported into Malaysia. Any product that contains timber that was harvested, processed, manufactured, or exported outside of Malaysia is out of scope of the CSG.

While these products are not in-scope of this CSG, the information contained in this document may assist importers in conducting due diligence using either the timber legality framework or the regulated risk factors pathways detailed in section 11 and section 13 respectively of the Regulation.

4 Overview of Forest Management in Malaysia

Malaysia is a tropical country that covers an area of about 33 million hectares consisting of 3 regions: Peninsular Malaysia, the state of Sabah and Sarawak. Malaysia regards its natural forest resources as an important and valuable resource that contributes significantly towards the country's economy and environmental well-being. As such, Malaysia is committed to ensure at least 50% of her land area remain as forest and adhered to the Principle of Sustainable Forest Management (SFM). In addition, Malaysia encourages SFM through forest certifications which among others include the Malaysian Timber Certification Scheme (MTCS), Programme for the Endorsement of Forest Certification (PEFC) and other internationally recognised schemes. These schemes continuously support the trade in timber and timber products that use wood originating from sustainable and legal sources that take into account the environmental, social and economic aspects of SFM.

Generally, there are 3 categories of forest: Permanent Reserved Forest (PRF)/ Permanent Forest Estates (PFE), state land forest and alienated land. The management of the forestry sector is governed under the National Forestry Policy and laws which has stringent forest laws and regulation to monitor and enforce forest related activities.

In Peninsular Malaysia, the Forestry Department Peninsular Malaysia (FDPM) and respective state forestry departments are responsible for the management of PRF. The state forestry departments have control over the removal of timber from state land and alienated land forest. This is regulated by the National Forestry Act 1984 and guided by the National Forestry Policy 1978 (revised 1992). The Malaysian Timber Industry Board (MTIB) is the licensing authority for Peninsular Malaysia in issuing export and import licence for timber and timber products.

In Sabah, the Sabah Forestry Department (SFD) is responsible for forest management, control of harvesting operations, royalty payment requirements as well as issuance of export and import licence in line with the Forest Enactment 1968, Forest Rules 1969, Forest Timber Enactment 2015 and Forest (Timber) (Registration) Regulations 2017.

In Sarawak, the Forest Department Sarawak (FDS) and the Sarawak Forestry Corporation (SFC) are responsible for forest management. This is regulated by the Forests Ordinance, 2015 (Cap. 71). Sarawak Timber Industry Development Corporation (STIDC) is the licensing authority to issue export and import licences for timber and timber products in Sarawak.

MTIB, SFD and STIDC are the respective licensing authorities for Peninsular, Sabah and Sarawak for issuing export and import licences for timber and timber products, as provided for under Schedule 2 of the Customs (Prohibition of Exports) Order 2017 and Customs (Prohibition of Imports) Order 2017. For timber products listed by the *Convention of International Trade in Endangered Species of Wild Fauna and Flora* (CITES), a CITES export or re-export permit issued by MTIB for Peninsular and Sabah, and FDS for Sarawak, can be considered as having fulfilled the applicable national and CITES requirements.

5 Timber products exported to Australia

Australia is one of Malaysia's most important markets for timber and timber products. [Table 3.1](#) provides a list of regulated timber products. These span across four Customs HS codes: namely 44, 47, 48 and 94. For the full list of regulated timber products subject to due diligence requirements refer to [Schedule 1 to the *Illegal Logging Prohibition Regulation 2012*](#).

Table 3.1 - List of Regulated Timber Products exported from Malaysia to Australia (HS Code)

Chapters	Headings	Description
44 – Wood and articles of wood	4407	Wood sawn or chipped lengthwise
	4408	Sheets for veneering
	4409	Wood, continuously shaped, not assembled
	4410	Particleboard
	4411	Fibreboard
	4412	Plywood, veneered panels and similar laminated wood
	4413	Densified wood
	4414	Wooden frames
	4418	Builders' joinery and carpentry, assembled wood panel
47 – Pulp of wood or of other fibrous cellulosic material	4701	Mechanical wood pulp
	4702	Chemical wood pulp, dissolving grades
	4703	Chemical pulp, soda or sulphate
	4704	Chemical wood pulp, sulphite
48 – Paper and paperboard; articles of paper pulp, of paper or of paperboard	4801	Newsprint, in rolls or sheets
	4802	Uncoated paper and paperboard
	4809	Carbon paper, self copy paper
	4811	Paper, paperboard
	4813	Cigarette paper
	4817	Envelopes, letter cards, plain postcards and correspondence cards

Country Specific Guideline for Malaysia (Sarawak)

Chapters	Headings	Description
	4818	Toilet paper, handkerchiefs, cleansing tissues towels tablecloths, serviettes, napkins for babies, tampons bed sheets, sanitary or hospital articles
	4819	Cartons, boxes, cases, bags and other packaging
	4820	Registers, account books, note books, order books, receipt books, letter pads, memorandum pads, diaries, and similar articles, exercise books
	4823	Other paper, paperboard
94 – Furniture & prefabricated buildings	9401	Furniture
	9403	
	9406	Prefabricated buildings

6 Laws and regulations governing forestry

6.1 Legal requirements for timber harvesting

The laws and regulations governing the harvesting of timber are:

- (i) Forests Ordinance, 2015 (Cap. 71)
- (ii) Forest Rules, 1962
- (iii) Wild Life Protection Ordinance, 1998 (Cap. 26)

6.1.1 Licensing process

Under the Forests Ordinance, 2015 (Cap. 71), any person(s) who wish to harvest timber must first obtain a licence or permit from the Director of Forests, in accordance with the following relevant provisions:

- (i) Section 40 (1) Power of the Director to issue a licence or permit in permanent forest, state land and alienated land;
- (ii) Section 52 - Power of the Director to issue licence under special conditions;
- (iii) Section 54 - Power of the Director to issue licence in government reserves;
- (iv) Section 55 - Power of the Director to issue a licence or permit in alienated land; and
- (v) Section 65 (1) - Power of the Director with the approval of the Minister to issue a licence for establishment of planted forests.

6.1.2 Harvesting process

Timber harvesting in Sarawak shall mean the taking, felling or removal of timber, and is regulated under the Forests Ordinance, 2015 (Cap. 71) and Forest Rules, 1962.

The Forest Department Sarawak (FDS) processes and approves the General Harvesting Plan (GP) which shows the layout and size of coupes, harvesting sequence, proposed road networks, camp sites, log dumping points and other general planning particulars for the entire licensed area.

The Sarawak Forestry Corporation (SFC) processes and approves the Detailed Harvesting Plan (DP). The DP contains operational prescriptions at the coupe level, the layout of logging blocks, surveyed road networks, protected or conservation areas as well as the proposed harvesting method. Further pre-harvesting safeguards to ensure compliance with the approved GP and DP are provided by the need for the logging operators to apply for a *permit to enter coupe* (PEC). The PEC process requires verification of satisfactory ground compliance in terms of coupes and blocks boundary demarcation, preparation of topographical work map, road alignment and construction, tree enumeration before the endorsement of blocks for logging.

6.1.3 Property marking and log tagging

A licensee is required to register the company property mark with the Director of Forests as required under Rule 25 (1) of the Forest Rules, 1962. At the Forest Landing a licensee will do the following:

- (i) Mark both ends of each log with his registered property mark;
- (ii) Scale and grades each log (determines the log volume);
- (iii) Affix a Log Production Identity (LPI) tag to each log; and
- (iv) Submit log details in the Daily Production Return (DPR) to SFC.

SFC checks to ensure that harvesting operations have taken place within approved areas in compliance with Forest Timber Licence (FTL) terms and conditions, and that the licensees use only approved LPI

numbers. SFC checks and verifies the DPR information and uploads this into the Sarawak Logs Tracking and Revenue System (Revlog). Revlog is a custom-built ICT tool and network application used in Sarawak to monitor and control the movement of logs. The licensee then moves the logs to the Forest Checking Station (FCS) for royalty assessment.

6.1.4 Royalty assessment process

Payment of royalty and other payments to be made to the Government for timber harvested from a licenced area are required under Section 45(1), 46(1), 47(1), 48(1) and 48 (2) of Forests Ordinance, 2015 (Cap. 71).

A licensee shall apply for royalty assessment of their logs by submitting a Log Specification Form (LSF), Log Specification Summary (LSS) and DPR. SFC will conduct the royalty assessment of the logs by embossing the Government hammer mark 'JH' at both ends of the logs.

At the Forest Checking Station, SFC will issue the **Removal Pass (Royalty)** (see [Attachment 3.1](#)) for timber that have been assessed for royalty and dues paid to the Government. The Removal Pass (Royalty) shall be used to demonstrate the legality of timber harvesting in Sarawak.

6.1.5 Movement of logs

Harwood Timber Sdn. Bhd. (HTSB) has been appointed by the State Government of Sarawak through the Director of Forests as an authorised agency for the purpose of discharging such functions as prescribed under Section 64(5) and 64 (7)(a) of the Forests Ordinance, 2015 (Cap 71).

HTSB will conduct a physical inspection of the logs that have been royalty assessed and subsequently issue the **Endorsement Clearance Certificate (ECC)** (see [Attachment 3.2](#)) and the Shipping/Land Transportation Pass. This is then followed by SFC issuing the **Removal Pass (Transit)** (see [Attachment 3.3](#)) before the logs are transported from the Forest Checking Station to either a mill or export point.

For logs that are to be exported, there is a further physical inspection carried out at the export point by HTSB followed by the issue of the **Export Clearance Certificate (ExCC)** (see [Attachment 3.4](#)). SFC then issues a **Removal Pass (Transit)** for export (see [Attachment 3.5](#)), and STIDC issues the Export Licence. All documents must be in place before the Royal Malaysian Customs Department (RMCD) gives the port clearance for export.

6.1.6 Prohibitions and restrictions of harvesting timber

Totally Protected Plants and Protected Plants are two different categories of plants stipulated in **Part I and Part II of the Second Schedule of the Wild Life Protection Ordinance, 1998** (Cap. 26) – see [Attachment 3.6](#).

The harvesting of timber is totally prohibited in Totally Protected Areas (TPA) such as National Parks, Nature Reserves and Wild Life Sanctuaries as stated in the National Parks and Nature Reserves Ordinance, 1998 (Cap.27) and the Wild Life Protection Ordinance, 1998 (Cap. 26).

A written permission from the Controller of Wild Life is required to harvest any Totally Protected Plants for scientific or educational purposes, failing which it is an offence under Section 30 (1) of Wild Life Protection Ordinance, 1998 (Cap. 26).

As for Protected Plants, harvesting is allowed in accordance with the terms and conditions of a licence issued by the Controller of Wild Life, failing which it is an offence under Section 30 (2) of the Wild Life Protection Ordinance, 1998 (Cap. 26).

6.1.7 Statutory charges

A licensee is required to deposit a security, guarantee or bond with the Government within a specified time upon the issue of the licence as indicated in the licence conditions.

Section 45 (1), 46(1), 47(1), 48(1) and 48(2) of Forests Ordinance, 2015 (Cap 71) requires a licensee to pay royalties, premiums and fees payable to the State Government for timber harvested from the licenced area.

6.2 Indigenous peoples' rights

Under the Second Schedule of the FTL document, state land areas subject to Native Customary Rights (NCR) are excluded from the licenced area. However, these areas may be allowed to be harvested with prior consent of the NCR land owners and subsequent approval of the Director of Forests.

In addition, under the Forests Ordinance, 2015 (Cap 71), at the request of a community, the State can constitute any state land to be a Communal Forest (CF). The constitution of the Communal Forest falls under Part III Chapter 2 of the Forests Ordinance, 2015 (Cap. 71) which means making state land into a Communal Forest after fulfilling the due process. The community may take any forest produce from this area for their own domestic use.

7 Timber Processing

For the manufacturing of sawn timber a **Sawmill Licence** (see [Attachment 3.7](#)) is mandatory. For all timber products a **Mill Registration Certificate** (see [Attachment 3.8](#)) is mandatory. These are issued by the Sarawak Timber Industry Development Corporation (STIDC).

Laws related to processing of timber and timber products include:

- (i) Forests Ordinance, 2015 (Cap 71);
- (ii) Sarawak Timber Industry Development Corporation Ordinance, 1973;
- (iii) Sarawak Timber Industry (Registration) Regulations, 2008; and
- (iv) Industrial Co-ordination Act 1975 (Act 156).

7.1 Exports of timber and timber products

The Sarawak Timber Industry (Registration) Regulations, 2008 – made under Section 24 of the Sarawak Timber Industry Development Corporation (STIDC) Ordinance, 1973 is a mandatory requirement for any persons or companies engaged in or associated with the manufacture, sale and marketing (export and imports) of timber and timber products in Sarawak to be registered with STIDC.

Registered persons or companies are issued with a **Certificate of Registration** (see [Attachment 3.9](#)) which is and renewable annually. Registered companies are allowed to export timber and timber products upon obtaining an Export Licence from STIDC.

Laws related to export of timber and timber products:

- (i) Customs Act 1967 (Act 235), Customs (Prohibition of Exports) Order 2017;
 - (ii) Customs (Prohibition of Exports) (Amendment) Order 2019;
 - (iii) Sarawak Timber Industry Development Corporation Ordinance 1973; and
 - (iv) Sarawak Timber Industry (Registration) Regulations, 2008.
- (iv) Under the Customs Act 1967 (Section 10), STIDC officers are authorised by the Director General of the RMCD to issue an Export Licence for every shipment of timber and timber products from Sarawak. The Export Licence is endorsed on the **Customs Export Declaration Form (K2)** (see [Attachment 3.10](#)). The Export Licence is a document of proof of legal timber exported from Sarawak. The Export Licence will only be issued after the legal compliance in the chain of timber harvesting process is fulfilled.
- (v) The Second Schedule of the Customs (Prohibition of Exports) Order 2017, lists the timber and timber products that require an Export Licence prior to an export. [Table 3.2](#) shows the list of timber products currently being exported from Sarawak to Australia that require an Export Licence.

There is no export duty imposed by the Sarawak Government for the export of timber and timber products from Sarawak.

For protected plants, the **Form of Licence/Permit** (see [Attachment 3.11](#)), issued by the Controller of Wild Life for Protected Species, is a prerequisite document for STIDC to issue an export licence.

Table 3.2 – List of timber products exported to Australia which require an export licence

No.	Types of Products	Customs HS Code
1.	Plywood and similar laminated wood	4412
2.	Sheets for veneering	4408
3.	Wood sawn or chipped lengthwise	4407
4.	Wood, continuously shaped, not assembled	4409
5.	Particleboard	4410
6.	Fibreboard	4411
7.	Builders' Carpentry and Joinery, Assembled wood panel	4418
8.	Furniture	9403

7.2 Imports of timber and timber products

Importers of timber and timber products are required to register with STIDC. To import logs, importers are required to seek prior written approval from the Ministry of Urban Development and Natural Resources (MUDeNR), Sarawak.

The Customs (Prohibition of Imports) Order 2017 and Customs (Prohibition of Imports) (Amendment) (No.2) Order 2019 list of products for which an Import Licence from STIDC is required to import into Sarawak. The following documents must also be attached to apply for an Import Licence:

- (i) CITES Certificate from country of source (if applicable);
- (ii) Certificate Country of Origin (COO); and
- (iii) Phytosanitary Certificate.

Every shipment of imported logs into Sarawak must have an **Import Licence (Application for Import Permit/Import Permit Form JK69)** (see [Attachment 3.12](#)) from STIDC. Importers of logs must declare consignments using Customs Declaration Form 1 or Customs Chit 1 Form at the port of arrival once the consignment has been approved and issued with an Import Licence by STIDC. The imported logs are then subject to a physical inspection, tagged and issued a STIDC Removal Pass by STIDC before an importer is allowed to transport the logs to a mill.

For other timber products, an importer is required to make appropriate declaration using **custom form (K1)** (see [Attachment 3.13](#)) and seek clearance from the RMCD prior to importation.

7.3 Trade in CITES-listed products

For plant species listed under [Appendix I and II of CITES](#), the **CITES Certificate** (see [Attachment 3.14](#)) will be issued by the FDS, which is the Management Authority in Sarawak. This CITES Certificate is also a prerequisite document for the issuance of an Export Licence by STIDC.

Laws related to trade in CITES-listed timber species include:

- (i) Customs Act 1967 (Act 235), Customs (Prohibition of Exports) Order 2017; and
- (ii) Wild Life Protection Ordinance, 1998 (Cap.26).

7.4 Other relevant laws relating to legal timber

Other relevant laws that relate to legal timber include:

- (i) National Parks and Nature Reserves Ordinance, 1988 (Cap.27);
- (ii) Sarawak Timber Industry Development Corporation Ordinance, 1973;
- (iii) Sarawak Timber Industry (Registration) Regulations, 2008; and
- (iv) Natural Resource and Environment (Prescribed Activities) Order, 1994.

8 Identifying legal products

An Export Licence endorsed on the **Customs Export Declaration Form (K2)** (see [Attachment 3.10](#)) issued by STIDC demonstrates timber legality for products exported from Sarawak.

Sarawak has in place a timber legality verification system known as *Sarawak Timber Legality Verification System (STLVS)*. This system tracks timber movements from forest areas to mills or export points. It includes processes for timber identification, production records, royalty assessment and control of timber movement.

[Attachment 3.15](#) shows the **schematic diagram** of the verification process and agencies involved.

9 Legality of manufactured timber products

9.1 Registration as a manufacturer and/or an importer

Under the Sarawak Timber Industry (Registration) Regulations, 2008, it is mandatory for any persons or companies engaged in or associated with the manufacture and/or import of timber to be registered with STIDC as a manufacturer and/or an importer.

9.2 Traceability of domestic sources

Laws and regulations covering the supply of logs from domestic sources are explained in [Section 6](#).

9.3 Traceability of import sources

Laws and regulations covering the supply of logs from import sources are explained in [Section 7.2](#)

Attachment 3.6 List of Totally Protected Plants and Protected Plants

(Part I - Totally Protected Plants and Part II - Protected Plants)

SECOND SCHEDULE	
(Section 2(1))	
PART I	
TOTALLY PROTECTED PLANTS	
Scientific Name	Common Name
1. All <i>Rafflesia</i> species	Bunga pakma
2. <i>Dipterocarpus oblogofolius</i>	Ensurai
PART II	
PROTECTED PLANTS	
1. <i>Shorea macrophylla</i>	Engkabang jantung
2. <i>Shorea splendida</i>	Engkabang bintang
3. <i>Shorea helmsleyana</i>	Engkabang gading
4. <i>Shorea siminis</i>	Engkabang terendak
5. <i>Shorea palembanica</i>	Engkabang asu
6. <i>Shorea stenoptera</i>	Engkabang rusa
7. <i>Shorea pinanga</i>	Engkabang langai bukit
8. <i>Shorea ochracea</i>	Raw
9. All <i>Ficus</i> species	Pokok ara
10. <i>Sonneratia alba</i>	Perepat
11. <i>Sonneratia caseolaris</i>	Pedada
12. <i>Avicennia alba</i>	Api-api hitam
13. <i>Avicennia lanata</i>	Api-api
14. <i>Avicennia marina</i>	Api-api merah
15. <i>Avicennia officinalis</i>	Api-api sudu
16. <i>Lumnizera littorea</i>	Terentum merah
17. <i>Koompassia excelsa</i>	Tapang
18. <i>Koompassia malaccensis</i>	Menggris
19. <i>Aetoxylon sympetalum</i>	Kayu gahru
20. <i>Aquilaria beccariana</i>	Kayu gahru, engkaras (I)

WILD LIFE PROTECTION
