Foreword

With just over 18 months in operation as an approved co-regulatory arrangement under the Federal Government's Product Stewardship (Television and Computers) Regulation 2011, MRI PSO Pty Ltd (MRI PSO), the product stewardship arm of MRI E-cycle Solutions has successfully completed the hand-over from DHL and made steady progress toward re-establishing its collection network and growing its membership.

All of MRI PSO's liable parties renewed their membership with several new liable parties also joining MRI PSO in 2016-17.

For several reasons MRI PSO's arrangement target for 2016-17 of 10,247.5 tonnes was slightly down on the previous year of 10,849 tonnes. This was a result of new electronics becoming lighter, as well as fluctuations in market composition and liable party numbers.

The average fees charged to liable parties for the year increased only slightly due to competition between arrangements. This combined with increasing transport costs and falling commodity prices limited MRI PSO's intended investment in promoting our collection network above and beyond the requirements of the regulation.

E-waste volumes received through our Drop Zone collection network were up slightly as we grew the number of permanent and event sites from 248 to 250 nationwide. This provided nearly every Australian with reasonable access to one of our conveniently located, free public Drop Zone collection points.

However, due to a drop in the volume of CRT televisions received and the unanticipated closure of a key collection site during the year, MRI PSO fell just short of our target of 10,247.5 tonnes by just 365 tonnes.

MRI will collect this minor shortfall in 2017-18, in addition to the Arrangement's Target for that year. This will be achieved by more promotional activity to increase volumes through our Drop Zone network, expanding our Drop Zone network and working with our members and their customers to recover more product.

In partnership with our recyclers, we continued to achieve very high resource recovery rates with over 96% of the e-waste collected being diverted from landfill and the various materials recovered for use in the manufacture of new products.

Without the support of liable parties and our partnerships with local councils, retailers, transporters, recyclers and social enterprises, we would have not achieved these solid results.

It is with genuine gratitude that I thank all individuals and organisations involved in contributing to the success of the program in 2016-17. We look forward to ongoing collaboration with key stakeholders and suppliers in helping to deliver the National Television and Computer Recycling Scheme.

Looking to the future we are committed to increasing our volumes collected and processed continuous improvement of our systems and services to meet the challenging targets set in regulation. We consider it important that the all stakeholders be involved in the forthcoming review of the NTCRS and that the review looks to an expanded scheme in line with community expectations and at least matching progress towards a circular economy in offshore jurisdictions.

A handwritten signature in black ink, appearing to read 'Will LeMessurier'.

Will LeMessurier
Managing Director and Administrator, MRI (Aust) Pty Ltd & MRI PSO Pty Ltd

2016-17 Summary

Target	10,247.5 tonnes
Carried forward	2,561.8 tonnes
Collected & recycled	7,319.9 tonnes
Materials recovered	7,026.0 tonnes

Providing reasonable access
to most Australian residents

96% material recovery rate

Working with five recycling partners across 10 metropolitan and regional facilities nationwide, who work with a number of enterprises that employ more than 100 people all committed to working to Australia's standard AS/NZS5377:2013 for the collection, transport and recycling of electrical and electronic waste.

...providing assurance to our liable party members and
sustainable outcomes for our planet

Governance Systems

OUTCOMES

In achieving the outcomes and meeting the requirements in the regulations – MRI PSO has worked hard to achieve all the targets that have been in place under the NTCRS. While continuing to achieve the resource recovery rate and providing reasonable access to the community MRI PSO fell just short of the collection target due to the unplanned closure of a key metropolitan collection point and the reduction of forecasted volumes from other metropolitan sites due to a greater than expected reduction in the volume of CRT TVs recycled by the community.

RISK MANAGEMENT

MRI PSO is mindful of the associated risks of being an approved co-regulatory arrangement under the NTCRS. The directors and senior managers are part of continuous improvement processes of MRI PSO's performance through regular management reviews where strategies are assessed to ensure that they will meet the Scheme objectives and minimise any risk for the Scheme, liable parties, collectors, transporters, recyclers and MRI PSO. Internal and external auditors are employed on a regular basis to ensure that MRI PSO's operations are compliant with all relevant OH&S and environmental regulations and the Scheme outcomes and objectives as specified in the Product Stewardship (Television and Computer) Regulation 2011 and Product Stewardship Act 2011.

ADMINISTRATION

MRI PSO's scheme is operating to a high standard. At this point there is no requirement in place to replace the Administrator. Should the situation change MRI PSO's policies and procedures would allow for an effective and seamless transfer of responsibilities to an alternate Administrator.

MRI PSO TEAM

Office Supervisor

Product Stewardship Arrangement Milestones

NOV 2011	DHL Supply Chain first organisation to submit application under new Regulations
APRIL 2012	Signed first Liable Party Member
MAY 2012	DHL Supply Chain received co-regulatory arrangement approval
MAY 2012	First Drop Zone collection point commenced operations
MAY 2012	Achieved coverage in every state & territory
JUNE 2013	Achieved 100% of 2012-13 targets
DEC 2013	Achieved reasonable access requirement
JUNE 2014	Achieved 100% of 2013-14 targets
JUNE 2015	Achieved 50,000 tons cumulative
FEB 2016	Transferred co- regulatory arrangement to MRI PSO
JUNE 2016	Achieved 2015-16 recycling and resource recovery targets
JUNE 2017	Achieved 2016-17 resource recovery targets and rebrand

Being socially responsible

MRI PSO is committed to:

- providing efficient and cost-effective product stewardship services to electronics manufacturers and importers,
- ensuring that their products are collected and recycled to the highest environmental standards, and
- delivering significant environmental and social benefits to the community and business.

We recognise the need for continuity of service to the community and are committed to working closely with councils to find the best possible solution that meets local requirements and community expectations.

We also value the long-term social and economic benefits of working with local communities and social enterprises, MRI PSO is keen to work with councils in realizing these outcomes in each council area.

In our second year of operation, we have continued to maintain, nurture and grow our relationships with existing and new partners along the product stewardship chain from liable parties, retailers, local councils, transporters, recyclers through to the consumers, SMEs, corporates and governments.

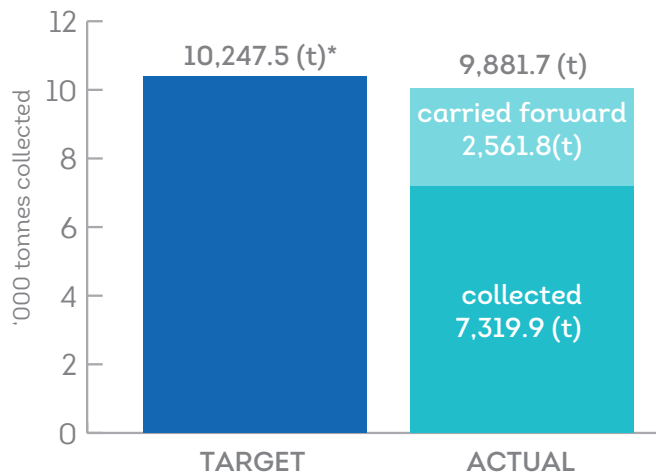

We are focused on ensuring householders and small businesses are aware of and have access to free collection points, through our well-established Drop Zone collection network across all states and territories.

MEMBERSHIP

In 2016-17 all existing members renewed their relationship with MRI PSO and we welcomed new liable parties to our arrangement. Through regular meetings all our liable parties have been kept informed of how MRI PSO has progressed throughout the year with collections, reasonable access and resource recovery targets. We have also encouraged our members to provide input on the statutory review of the Act and Regulation.

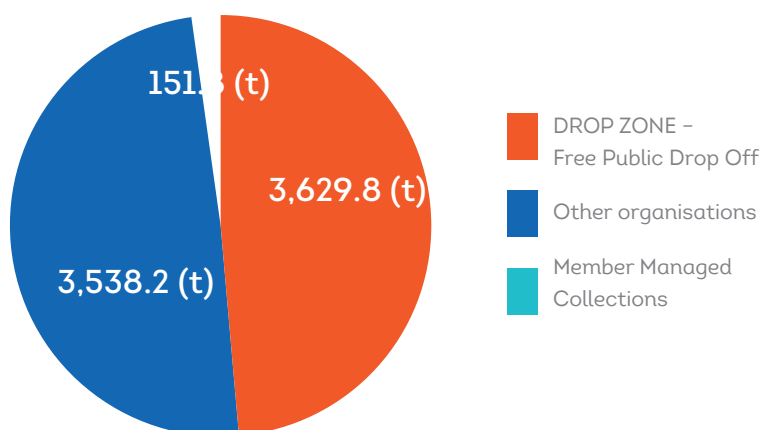

Recycled

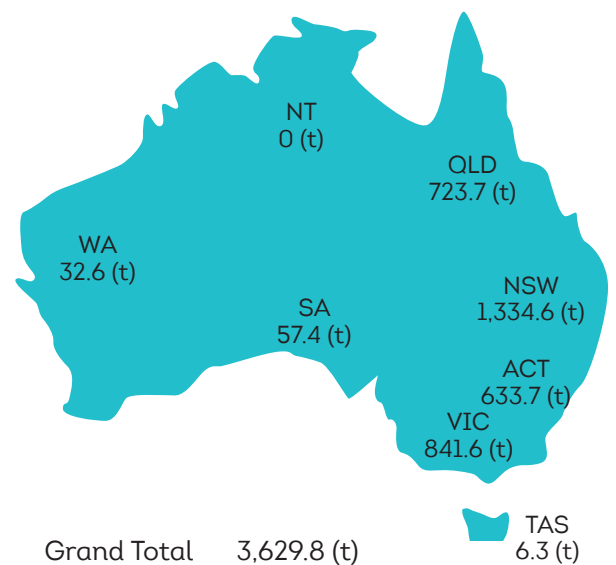

(* as advised by the department on 12 July 2016)

Collection Sources

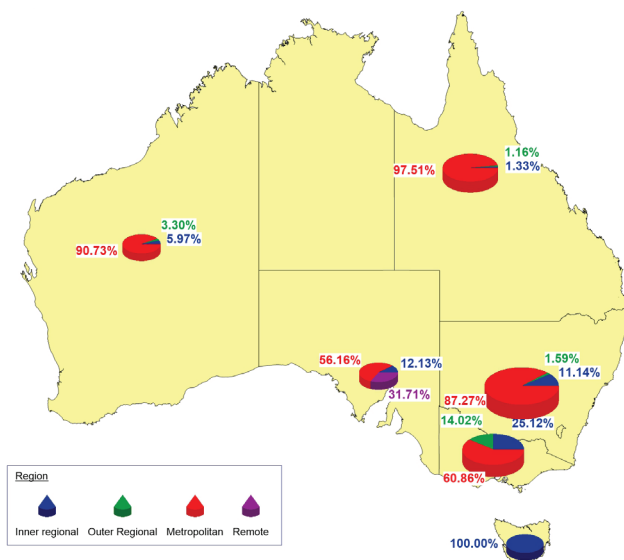

Drop Zone Collections (t) by State

Grand Total 3,629.8 (t)

Weight of Drop Zone collection by region FY2017

See Appendix 4 for a summary of the total weight of product collected by state and region.

Free accessible collection network for householders and small business.

MRI PSO's free collection service for householders and small business involves a combination of 250 permanent and event based collection sites including 135 retailer sites located in metropolitan, inner regional, outer regional and remote areas across Australia.

MRI PSO's primary focus for collection services is on permanent collection sites which are associated with council waste transfer stations and a national retail network in partnership with Officeworks. This year we also conducted over 50 e-waste events in regional and remote locations. However, finding a suitable site to host a free e-waste collection service in Thursday Island has proved to be extremely challenging. MRI PSO is still trying to find a genuine solution for Islanders and hopes to have a permanent site in place shortly.

The rationale for this is based on householder and small business familiarity with disposing of waste at both council and Officeworks sites and continuity of service. As well as the ability to expand on existing council and retailer communication channels to encourage the community to take televisions and computers to the same facilities.

Officeworks through its Bring I.T. Back and RecycleTV initiatives provided a collection network for computers, printers and computer related products such as hard drives, keyboard and mice throughout the year and for televisions for the months of November and December 2016

Number and Type of Drop Zone Collection Points

Collection Sites	No. of sites	Volume (t)
Event	32	4.1
Collection Station	84	3,187.9
Retailer**	135	437.8
TOTAL	251	3,629.8

ONLINE PROMOTIONS

To ensure the public can find their nearest free Drop Zone collection point, MRI PSO has updated and improved its consumer facing website www.dropzone.org.au. The new page can be easily viewed on desktop, tablet or mobile devices and includes an easy to use collection locator, details on what products can be recycled and information about the Scheme. MRI PSO has also grown its presence in social media through its twitter accounts @mripso and @mriecycle and has also recently set up a facebook page to further promote and share information about the program to all the community, small business, local councils and interested parties.

MRI PSO and Drop Zone's rebrand was completed in March 2017 and included a refreshed website and initiation of a program to update signage across all collection sites over the next 12 months.

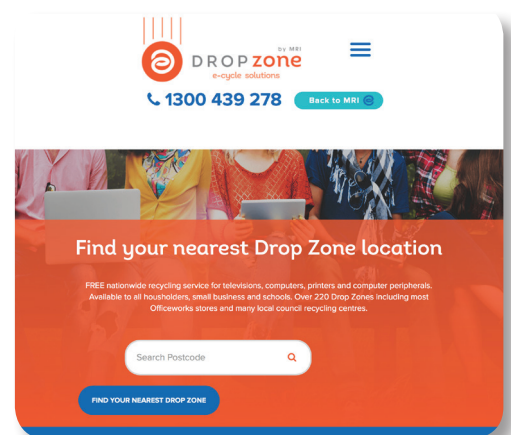

COLLECTION SITE PROMOTIONS

Each collection site is provided with signage and promotional material identifying what can be recycled, data management and contact details for further enquiries. As part of MRI PSO's re-branding process signage and supporting materials at all sites are being updated in association with the annual audit program.

ADVERTISING

Officeworks assisted the co-regulatory arrangement in promotions by advertising both Bring I.T. Back and RecycleTV initiatives in-store at point of sale, online via its video <https://youtu.be/KjBVLE8uEZO> and in catalogues, with a specific Recycle TV promotion throughout November 2016.

MRI PSO also advertised and promoted its e-waste events across regional and remote Australia in local papers and online.

Free E-waste Recycling

For householders and small business

Thursday, 29 June - 9am - 5pm

Accepted

- Televisions and computer monitors
- Computer equipment - desktops, laptops, tablets, notebooks, printers, scanners, computer peripherals and parts, cords and cables

Not Accepted

- DVD players, video recorders, radios/stereos, game consoles, appliances/microwaves, power tools, mobile phones

All items will be recycled. Nothing will be resold.
Over 90% of material recovered.

Drop off at: Multiblock
186 Falconer Street, Guyra

Recycling

RECYCLERS

MRI PSO engaged five recyclers, operating across 10 facilities nationally to process product in 2016-17. Four of these recyclers work in conjunction with social enterprise firms that provide job opportunities for people with disabilities and long term unemployment. All recyclers using a disability workforce comply with the relevant state and territory legislation, as well as the federal laws.

The recyclers that processed product in 2016-17.

State	Recycler
Western Australia	Total Green Recycling (Perth)
South Australia	SA Group Enterprises Incorporated* (Electronics Recycling Australia - Adelaide)
Victoria	MRI E-cycle Solutions (MRI (Aust) - Campbellfield, Community Axis Enterprises - Horsham**, Outlook Environment - Darebin**)
Australian Capital Territory	MRI E-cycle Solutions (Fyshwick - ACT)
Queensland	MRI E-cycle Solutions (Hemmant - QLD)
New South Wales,	MRI E-cycle Solutions (Seven Hills - NSW), Kurrajong Waratah* (Wagga Wagga)
Tasmania	City Mission Launceston*

* social enterprises

** social enterprises operating as part of MRI E-Cycle Solutions group.

To ensure compliance with all relevant OH&S, environmental regulations and AS/NZS 5377:2013, MRI PSO conducted separate audits of each recycler. This included verifying certifications, downstream processing, material recovery rate calculations and sourcing of product outside of that collected from MRI PSO's collection network Drop Zone. Each recycler and their downstream processors have measurable landfill diversion rates of more than 90%.

Overall MRI PSO achieved a material recovery rate of 96% in 2016-17.

MRI PSO also worked closely with transporters and collectors to ensure that handling, storing and processing e-waste are consistent with AS/NZS 5377:2013.

MATERIAL RECYCLED

MRI PSO's recyclers processed a total of 7,319.9 tonnes of televisions, computers and computer related product during 2016-17. No product was stockpiled or stored outside of a recycling facility during the 2016-17 year.

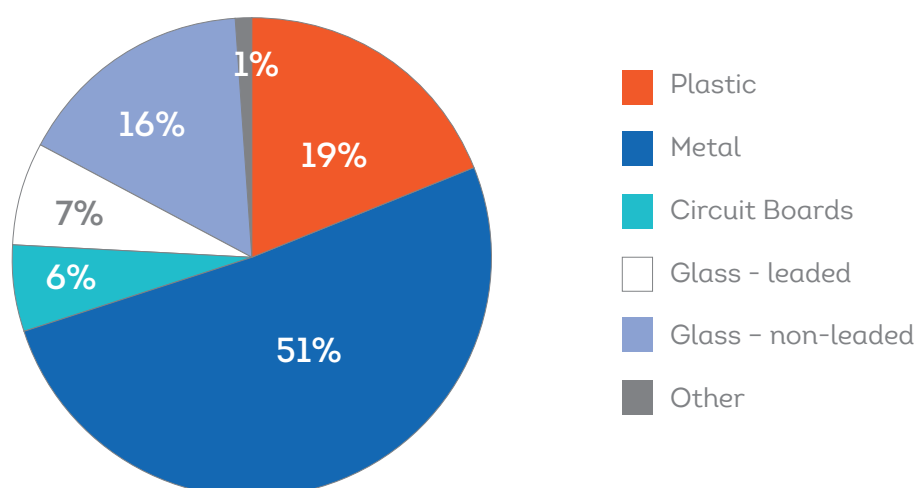

WHERE MATERIAL WAS RECYCLED

Where recycled	Volume (kg)
Material recovered in Australia	4,089,841.98
Material Disposed to landfill in Australia	182,850.34
Material Exported & recovered overseas	2,936,165.1
Material Exported & disposed to landfill overseas	111,070.7
TOTAL	7,319,927.93

COUNTRY OF DESTINATION FOR EXPORTED MATERIAL PROCESSING AND DISPOSAL TO LANDFILL

Country of Destination	Total Exported (t)	Landfill (t)
Hong Kong	54,930.39	823.72
Korea	216,361.7	8,169.5
Japan	1,508,172.8	48,620.9
China	1,267,770.9	53,456.5
TOTAL	3,047,235.8	111,070.7

MATERIAL RECOVERED

EXPORTED WHOLE UNITS

There were no whole units of televisions, computers or computer product exported overseas for recycling or re-use. MRI PSO's selected recyclers all have varying downstream processes which may see components exported overseas for further processing. These recyclers and their downstream processes have been audited in accordance with the NTCRS Regulations and AS/NZ 5377.

OH&S AND ENVIRONMENTAL MANAGEMENT

MRI PSO works closely with recyclers to review and identify areas of opportunity in the Employee Health and Safety and Environmental Management areas. Through the annual audit program and quarterly reporting any issues identified are actioned and rectified in a timely manner. No major issues were identified and there were no notifiable Occupational Health and Safety Incidents or Environmental Incidents reported for the period.

COLLECTIONS AND RECYCLING

Summary of product weight collected by channel, state and region

COLLECTION CHANNEL	Volume (kg)
Dropzone	3,629,867.96
Other	3,538,225.98
PSO Members	151,834.00
TOTAL	7,319,927.93

	Metropolitan	Inner regional	Outer Regional	Remote	Total
Australian Capital Territory	833,537.44				833,537.44
New South Wales	2,939,135.16	129,580.00	25,610.00		3,094,325.16
Northern Territory					-
Queensland	1,600,727.04	10,365.00	7,195.00		1,618,287.04
South Australia	33,948.00	7,152.00		18,134.00	59,234.00
Tasmania		122,952.50			122,952.50
Victoria	1,182,570.69	219,891.10	139,706.00		1,542,167.79
Western Australia	46,434.00	1,914.00	1,076.00		49,424.00
Total	6,636,352.33	491,854.60	173,587.00	18,134.00	7,319,927.93

Number and Type of Drop Zone Collection Points

Collection Sites	No. of sites	Volume (t)
Event	36	4.1
Collection Station	80	3,187.9
Retailer**	135	437.8
TOTAL	251	3,629.8

Drop Zone Collections (kg) by State

State	Volume (kg)
Australian Capital Territory	633,665.00
New South Wales	1,334,601.00
Northern Territory	-
Queensland	723,655.00
South Australia	57,402.00
Tasmania	6,309.50
Victoria	841,635.45
Western Australia	32,600.00
TOTAL	3,629,867.95

Where material was recycled

Where recycled	Volume (kg)
Material recovered in Australia	408,9841.98
Material Disposed to landfill in Australia	182,850.34
Material Exported & recovered overseas	2,936,165.1
Material Exported & disposed to landfill overseas	117,070.7
TOTAL	7,319,927.93

Country of destination for exported material processing and disposal to landfill

Country of Destination	Total Exported (kg)	Landfill (kg)
Hong Kong	54,930.39	823.72
Korea	216,361.7	8,169.5
Japan	1,508,172.8	48,620.9
China	1,267,770.9	53,456.5
TOTAL	3,047,235.8	111,070.7

Material recovered and landfilled

Materials Recovered	Domestic Material Breakdown (kg)	Landfill Material Breakdown (kg)	Exported Material Breakdown (kg)	Total (kg)
Plastic	14,720.49	-	1,372,273.51	1,386,993.99
Metal	2,387,251.35	-	1,237,104.72	3,624,356.07
Circuit Boards	19,855.65	-	430,769.19	450,624.84
Glass - leaded	463,968.44	-	-	463,968.44
Glass - non leaded	1,166,228.43	-	-	1,166,228.43
Other	37,817.62	182,850.34	7,088.20	227,756.16
Total	4,089,841.98	182,850.34	3,047,235.61	7,319,927.93

* Of the product exported for processing 2,936,165.1 kg was recovered and 111,070.7 kg was disposed to landfill
