

Biosecurity, we need Speed

So worth it to Pursue...

* Indigenous Communities are on the front line

Like Aust. lots of Challenges.

Biosecurity is a HAZARD, like

Hurricanes

DEEDS

Industry & Government

I'll STOMP on it!

= Solution x 8

large

small

and general public

EFFORT VS RETURN

Share the RISK but Industry = equals

Landholders

narrow the MESSAGE to get it out there

agronomist needs to be involved.

COLLABORATION

TRUST PARTNERSHIP

Stuart Anderson

Biosecurity

everybody to do your bit.

N.Z.

STRATEGY

following Australia

Getting business interested in

Biosecurity

SHARED BIOSECURITY CULTURE

wide range of Audiences

Stakeholders

- understand their needs
- mindsets
- impacts on them

Co-DESIGN

ENGAGEMENT is so Welcome

"for everyone touches all our lives."

Malcolm Letts

More Social Research Needed

what is biosecurity?

Responses! "which way do we go???"

SHARED RESPONSIBILITY

SHARED BIOSECURITY

more to be done, in this space....

Graphic Recording by Chris Wilson

Extreme Weather

CLIMATE CHANGE

extreme events

our management is becoming less effective...

Ramp up
Early warning
Share with neighbours

"feral herbivores"

We love this wild weather.

Pests & Diseases & Weeds

Changing Quickly

Unknowns

PREPAREDNESS

word of the DAY

Invasive Species
many species
weeds
Impacts are going to get Bad

use the Tools available, more consistently.

Fertility controls
eg wild horses
No Good

"It's COMPLICATED!"

don't mention the word BLEAK... Bleak... bleak

STORIES ← Listen!!!

FIRST AUSTRALIANS

our culture is a PROBLEM!!!

We need more Connection to COUNTRY

EMPOWER

Decade of HEALING

Argh! ?

answers are hard to come by.

care for our COUNTRY
TOGETHER

Aust. way of LIFE

FARMERS

we need to think about our Biosecurity

TRACEABILITY

Jeanna Bunting

"protect what we have... we need a National Strategy"

Leadership needed

supply chains strong & supported

leverage data

Intelligence

insight

surveillance

PHA

rapid responses

Important management decisions

APQD & P&DIL powerful tools

Sarah Forcoran

Bringing SYSTEMS together.

we are good at this

Technology

research

Industry

Science needs to be Understood

Translate Science to be friendly with

Co-design

- slow process
- needs to be successful

Build a Community (template) to use the tools

Science Professionals

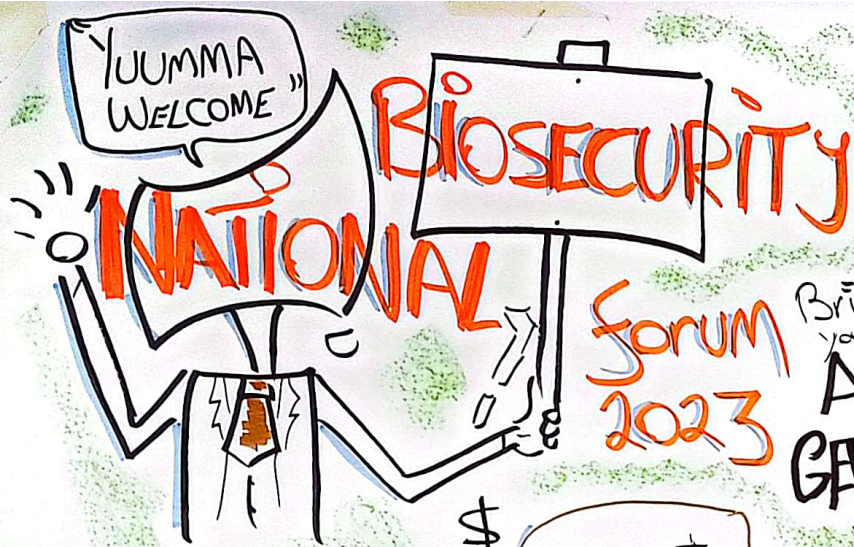

Technology needs to be implemented over a Long period of time

Embrace new Stakeholders Technology

Co-design - get the key Community involved.
