# Outline of the Export Control (Wild Game Meat and Wild Game Meat Products) Rules 2021

## Improved agricultural export legislation

### Introduction

Australia's new agricultural export legislation began on 28 March 2021. It comprises the *Export Control Act 2020* (the Act), and the Export Control Rules 2021 (the Rules) which set out the operational requirements that must be met to export specific goods from Australia (e.g. wild game meat).

The Export Control (Wild Game Meat and Wild Game Meat Products) Rules 2021 (the Wild Game Rules) specify how the export of wild game meat and wild game meat products are regulated. They set out:

- which wild game meat and wild game meat products are regulated
- the prescribed export conditions that must be complied with.

At the commencement of the new legislation, the Wild Game Rules replaced the previous legislation, including the Export Control (Wild Game Meat and Wild Game Meat Products) Orders 2010. The regulatory controls and oversight in the previous legislation have been maintained.

The Wild Game Rules set out the rules for regulating the export of wild game meat and wild game meat products. The Rules must be read with the Act.

### Key features of the Wild Game Rules

The Wild Game Rules formalise the current audit and inspection arrangements in relation to wild game meat and wild game meat products for export. Audit and inspection arrangements may be carried out by State and Territory or Australian Government officials. This maintains the current flexibility available for registered establishments and exporters.
