

IRAM – AIRLINE CODES QUICK REFERENCE GUIDE

Airline codes that require to be used in the Import Relationship Access Manager (iRAM).

iRAM Airline codes have been created that require to be used in the following scenarios:

1. Once an “Airline User” has been approved to use ADI application through their initial registration, a “Airline User” can then request to gain access to additional airlines as required by using the below airline codes. Video Tutorial in how to complete this process is available iRAM - How to add an additional airline to your airline user account within the ADI application.
2. Airline Administrators will also require to use the airline codes when changing and endorsing a individual account into an “Airline Administrator” role. Video Tutorial in how to complete this process is available iRAM - How to change an airline user account into an airline administrator account within ADI application.

The airline code required to use when requesting to gain access to additional airlines are in below table:

iRAM Code	Airline and Aircraft Operators Code	iRAM Code	Airline and Aircraft Operators Code
