

***eriss*** research summary

2004–2005

KG Evans, J Ravis-Hermann,  
A Webb & DR Jones (editors)

**Australian Government**

**Department of the Environment and Heritage  
Supervising Scientist**

It is SSD policy for reports in the SSR series to be reviewed as part of the publications process.

This SSR is a summary of the 2004–05 research program of the Environmental Research Institute of the Supervising Scientist and has been reviewed internally by senior staff and the editors of the volume.

# Contents

<b>Preface</b>	<b>ix</b>
<b>PART 1: RANGER – CURRENT OPERATIONS</b>	<b>1</b>
<b>Development of a contaminant pathways conceptual model for Ranger mine</b>	<b>5</b>
R van Dam & P Bayliss	
<b>Preliminary assessment of bioaccumulation and trophic transfer of key metals from Ranger mine</b>	<b>9</b>
R van Dam, C Sauerland, K Turner, C Humphrey, B Ryan & A Bollhöfer	
<b>Influence of calcium on the ecotoxicity of magnesium: Implications for water quality trigger values</b>	<b>15</b>
R van Dam, A Hogan, C McCullough, C Humphrey, S Nou & M Douglas	
<b>Chronic toxicity of uranium to the tropical duckweed, <i>Lemna aequinoctialis</i></b>	<b>20</b>
R van Dam, S Nou & A Hogan	
<b>Development of a reference toxicity testing program for <i>Chlorella</i> sp. and <i>Hydra viridissima</i></b>	<b>24</b>
A Hogan, R van Dam & S Nou	
<b>Revision of the ecotoxicology laboratory manual</b>	<b>27</b>
A Hogan	
<b>Atmospheric radiological monitoring in the vicinity of Ranger and Jabiluka</b>	<b>28</b>
A Bollhöfer, D Elphick & SA Atkins	
<b>Monitoring of radionuclides in groundwater at Ranger</b>	<b>31</b>
B Ryan	
<b>Radon concentrations in air in the Alligator Rivers Region</b>	<b>32</b>
A Bollhöfer & P Martin	
<b>Introduction to SSD's stream monitoring program for Ranger, 2004–05</b>	<b>35</b>
C Humphrey	

<b>Chemical and physical monitoring of surface waters in Magela and Gulungul Creeks</b>	<b>36</b>
M Iles	
<b>Creekside monitoring in Magela Creek</b>	<b>40</b>
C Humphrey, D Buckle & R Luxon	
<b>Monitoring using macroinvertebrate community structure</b>	<b>43</b>
C Humphrey, J Hanley, C Camilleri & A Cameron	
<b>Monitoring using fish community structure</b>	<b>46</b>
R Pidgeon & C Humphrey	
<b>Fish communities in channel billabongs</b>	<b>48</b>
C Humphrey, D Buckle & R Pidgeon	
<b>Fish communities in shallow lowland billabongs</b>	<b>54</b>
R Pidgeon, R Luxon & D Buckle	
<b>Publication of protocols for SSD's stream monitoring program in Magela Creek and Quality Control and Quality Assurance of SSD's stream monitoring program</b>	<b>58</b>
C Humphrey	
<b>Review of the bioaccumulation monitoring program</b>	<b>60</b>
C Sauerland, B Ryan, C Humphrey & D Jones	
<b>Surface water radiological monitoring in the vicinity of Ranger and Jabiluka</b>	<b>63</b>
C Sauerland, P Medley & J Sellwood	
<b>Surface water transport of uranium in the Gulungul catchment</b>	<b>67</b>
C Sauerland, K Mellor, D Parry & A Bollhöfer	
<b>PART 2: RANGER – REHABILITATION</b>	<b>71</b>
<b>Reliability assessment of Siberia model outputs</b>	<b>75</b>
KG Evans & GR Willgoose	

<b>Assessing the geomorphic stability of the currently proposed final landform at the Ranger mine using landform evolution modelling</b>	<b>77</b>
JBC Lowry & KG Evans	
<b>Radio- and lead isotopes in sediments of the Alligator Rivers Region</b>	<b>80</b>
A Bollhöfer & A Frostick	
<b>Radon exhalation at and around Ranger uranium mine</b>	<b>83</b>
C Lawrence, R Akber, P Martin & A Bollhöfer	
<b>Development of predictive habitat suitability models of vegetation communities associated with the rehabilitated Ranger final landform</b>	<b>86</b>
C Humphrey, I Hollingsworth & G Fox	
<b>Key aspects of native flora seed biology that support Ranger mine rehabilitation goals</b>	<b>99</b>
P Bayliss & S Bellairs	
<b>Key aspects of native flora seed biology that support Ranger mine rehabilitation goals. Part 1: Seed biology of selected Australian native grass species</b>	<b>100</b>
K Sangster & S Bellairs	
<b>Key aspects of native flora seed biology that support Ranger mine rehabilitation goals. Part 2: Progress on Kakadu Native Plant Supplies Project</b>	<b>103</b>
M Gardener, P Christophersen & S McGregor	
<b>Bioaccumulation in traditional Aboriginal bushfoods</b>	<b>106</b>
B Ryan, A Bollhöfer & P Martin	
<b>Assess Quickbird data for weed mapping and monitoring at Ranger</b>	<b>110</b>
K Pfitzner	
<b>Quantify stream sediment transport characteristics for Gulungul Creek to assess the impact of mine site erosion and rehabilitation performance of Ranger mine</b>	<b>112</b>
DR Moliere, MJ Saynor & KG Evans	

<b>Feasibility study of implementation of sediment monitoring system in Corridor and Magela creeks upstream and downstream of Ranger mine</b>	<b>116</b>
DR Moliere & MJ Saynor	
<b>PART 3: JABILUKA</b>	<b>117</b>
<b>Monitoring during the care and maintenance phase at Jabiluka</b>	<b>120</b>
M Iles	
<b>Monitoring suspended sediment at Jabiluka 1998–2003: establishing baseline</b>	<b>123</b>
KG Evans, DR Moliere, MJ Saynor, WD Erskine & MG Bellio	
<b>Monitoring suspended sediment at Jabiluka: 2003–2005</b>	<b>127</b>
DR Moliere, MJ Saynor & KG Evans	
<b>Baseline stream channel stability characteristics in the Ngarradj catchment</b>	<b>130</b>
MJ Saynor, WD Erskine, DR Moliere & KG Evans	
<b>Gully initiation near the Jabiluka project area</b>	<b>134</b>
MJ Saynor, WD Erskine, KG Evans & I Eliot	
<b>Scour and fill in the Ngarradj catchment between 1998 and 2003</b>	<b>139</b>
MJ Saynor, WD Erskine & KG Evans	
<b>Cross-sectional changes in the Ngarradj catchment between 1998 and 2003</b>	<b>143</b>
MJ Saynor, WD Erskine & KG Evans	
<b>PART 4: NABARLEK</b>	<b>147</b>
<b>Vegetation monitoring techniques at Nabarlek mine site using remote sensing and ground-based studies</b>	<b>150</b>
K Pfitzner	
<b>Assess a variety of spatial, spectral and temporal scaled remotely sensed data for rehabilitation assessment</b>	<b>153</b>
K Pfitzner	

<b>Sediment and radionuclide fluxes from the former Nabarlek mine</b>	<b>157</b>
GR Hancock, MK Grabham, P Martin, KG Evans & A Bollhöfer	
<b>Assessing the geomorphic stability of the rehabilitated Nabarlek mine using landform evolution modelling</b>	<b>160</b>
JBC Lowry, DR Moliere, GS Boggs & KG Evans	
<b>Radiological impact assessment of the rehabilitated Nabarlek site</b>	<b>163</b>
A Bollhöfer, B Ryan, P Martin & K Pfitzner	
<b>PART 5: GENERAL ALLIGATOR RIVERS REGION</b>	<b>167</b>
<b>Mangrove response to environmental change, especially climate change</b>	<b>170</b>
K Pfitzner	
<b>Ecological risk assessment of Magela floodplain to differentiate mining and non-mining impacts</b>	<b>172</b>
P Bayliss, R van Dam, J Boyden & D Walden	
<b>Significant habitats and species in the Alligator Rivers Region</b>	<b>186</b>
C Humphrey	
<b>Radiological case study: South Alligator River</b>	<b>188</b>
B Ryan, P Martin, A Bollhöfer & K Pfitzner	
<b>RESEARCH CONSULTANCIES</b>	<b>191</b>
<b>Australia's tropical rivers – an integrated data assessment and analysis</b>	<b>192</b>
R van Dam	
<b>A preliminary ecological risk assessment of the impact of Ginger ants (<i>Solenopsis geminata</i>) on colonies of seabirds at Ashmore Reef</b>	<b>193</b>
P Bayliss	
<b>Climate change vulnerability of wetlands</b>	<b>194</b>
I Eliot, MJ Saynor, K Pfitzner & M Eliot	

<b>Appendix 1 SSD publications for 2004–05</b>	<b>195</b>
<b>Appendix 2 ARRTC Key Knowledge Needs 2004–2005</b>	<b>203</b>
