

Methyl Bromide Fumigation Certificate

Requirements for Khapra Beetle

Treatments

Treatment certificates provided for methyl bromide fumigations conducted to manage the risk of khapra beetle, on or after 30 September 2021, must, at a minimum, include:

1. The certificate must include the treatment provider's letterhead including name, contact details, and physical address.
2. If the provider is registered with the department and listed on the List of Treatment Providers, then the certificate must include the Department of Agriculture, Fisheries and Forestry Entity Identifier (AEI).
3. Each certificate must include a unique certificate number issued by the treatment provider.
4. The certificate must include a description goods/package treated.
5. The certificate must include the quantity/volume of goods/package treated.
6. The certificate must include the name of fumigant.
7. The certificate must include the target of the fumigation (e.g. commodity/package/container/commodity and package)
8. The certificate must include the prescribed dose rate.
9. The certificate must include the applied dose rate.
10. The certificate must include the date of treatment.
11. The certificate must include the date treatment was completed.
12. The certificate must include the duration of treatment (in hours).
13. The certificate must include the minimum temperature.
14. The certificate must include the maximum pressure (if applicable).
15. The certificate must include the fumigation enclosure type (e.g. sheeted container/chamber).
16. This certificate must include the container number (where applicable).
17. This certificate must include any relevant statements confirming that the fumigation conformed to the plastic wrapping, impervious surface or timber thickness requirements of the Methyl bromide fumigation methodology at the time of fumigation (refer to the Minimum documentary and import declaration requirements policy).
18. The certificate must include a declaration that the fumigation has been carried out in accordance with all the requirements in the methyl bromide fumigation methodology.
19. The certificate must include any additional specific statements as required by the import conditions for the goods.
20. The certificate must include a signed declaration by the fumigator in-charge, including the name of the fumigator and the date.
