

APPROVAL OF AN ARTIFICIAL PROPAGATION PROGRAM

Australian Wildflowers Pty Ltd

Australian Wildflowers Pty Ltd, previously Grampian Wildflowers, has been approved as an artificial propagation program until October 2026 under Regulation 9A.18 of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) for the following:

Approved at genus level (excluding CITES Appendix I and EPBC listed species):

Acacia	Beaufortia	Hakea	Philotheca
Adenanthos	Boronia	Hypocalymma	Prostanthera
Agonis	Callitris	Isopogon	Scholtzia
Allocasuarina	Chamelaucium	Ixodia	Thryptomene
Anigozanthos	Corymbia	Leptospermum	
Atriplex	Dodonaea	Melaleuca	
Baloskion	Eucalyptus	Ozothamnus	
Banksia	Grevillea	Persoonia	

Artificially propagated specimens

Approval of this program means that artificially propagated specimens derived from the program are eligible for commercial export under the EPBC Act. An artificially propagated specimen is defined as a specimen grown under controlled conditions from seeds, cuttings, divisions, callus tissues or other plant tissues, spores or other propagules that are either exempt or have been derived from cultivated parental stock.

Variations to approval

The approval holder is required to seek a variation to the approval if they wish to export specimens from a species, genus or family that is not specifically covered by this approval.

Commercial export permits

Every international commercial shipment must be covered by an export permit. Exporters can apply for a permit from the Department's website at: http://www.environment.gov.au/biodiversity/wildlife-trade/commercial
