

# A coordinated national approach – climate change and agriculture

A work program to deliver a coordinated national approach to supporting the agriculture sector adapt to climate change and manage emissions is proposed. This is a collaborative approach across jurisdictions which provides flexibility to tailor approaches.

## Priorities

**1. Deliver information and tools for better decisions and climate risk management**

**2. Drive research and innovation to support adaptation and mitigation**

**3. Strengthen market opportunities and business models to build resilience**

**4. Prepare for increasing biosecurity risks**

## Actions

1.1. Deliver high quality climate information.

1.2. Support access to information and tools to better manage risk.

1.3 Support industry to build risk management skills.

2.1. Prioritise climate change in agriculture research and innovation.

2.2. Improve linkages across climate change research and innovation.

2.3. Enhance adoption of research and innovation.

3.1. Build resilience to climate change along supply chains.

3.2 Support access to offset opportunities or other incentives.

3.3 Collaborate in planning and investment in digital infrastructure on-farm.

4.1. Incorporate climate change considerations into biosecurity planning and response.
