

Errata

FOODmap: An analysis of the Australian food supply chain

The following amendments have been made to the publication since it was released in February 2012.

Page 20—PDF, Page 22—Word

Figure 11. Sources of fresh and processed food consumed in Australia based on Freshlogic analysis of value chain volumes

This graph was replaced to reflect more accurate data for the line 'Seafood'.

Page 32—PDF, Page 33—Word

Figure 22. Fresh dairy supply chain volume map

The table 'Domestic Sales of fresh products' contained an additional line which stated: "Foodservice 138,000t". This line has been deleted.

Page 39—PDF, Page 36—Word

This page has been replaced to provide more accurate data for the category and clarity of the shares of sales into channels.

Page 43—PDF, Page 39—Word

This page has been replaced to provide more accurate data for the category and clarity of the shares of sales into channels.

Page 46—PDF, Page 41—Word

This page has been replaced to provide more accurate data for the category and clarity of the shares of sales into channels.

Page 50—PDF, Page 44—Word

This page has been replaced to provide more accurate data for the category and clarity of the shares of sales into channels.

Page 54—PDF, Page 47—Word

This page has been replaced to provide more accurate data for the category to extend the species covered and clarity of the shares of sales into channels.

Page 59—PDF, Page 51—Word

This page has been replaced to provide more accurate data for the total fresh fruit and vegetable category (rather than the sum of selected categories) and clarity of the shares of sales into channels.

Page 60—PDF, Page 52—Word

Reference to the supermarket share has been revised and a better explanation for specialist retailers has been included.

Page 62—PDF, Page 53—Word

The supermarket share referred to in paragraph 2 has been revised for consistency with page 59.

Page 63—PDF, Page 54—Word

Figure 54. Eggs supply chain volume map

The tables on the right of the volume map are incorrect.

The table 'Domestic sales eggs' contained an incorrect description for the 2nd line. 'Food service' has been replaced with 'Specialty'.

The table 'Domestic usage processed eggs' contained an incorrect figure. '13,000t' has been replaced with '32,000t'.

Page 72—PDF, Page 61—Word

Figure 64. Wine supply chain volume map

The table 'Domestic sales ('000 litres)' has been printed assigning all volumes to "specialty". The volume has been changed to apply to all. No available public data is available on the share of sales by channel.

Page 97—PDF, Page 83—Word

This page has been replaced to provide more accurate data for the total fresh fruit and vegetable category, rather than the sum of selected categories, and clarity of the shares of sales into channels.

Page 98—PDF, Page 84—Word

Figure 92. Sources of major fresh and processed fruit consumed ('000 tonnes)

This graph and related text has been changed to reflect revised workings for some of the categories, to be consistent with the revised pages 59 and 97.

Page 99—PDF, Page 84—Word

Figure 93. Sources of selected fresh and processed vegetables consumed ('000 tonnes)

This graph has been changed to reflect revised workings for some of the categories, to be consistent with the revised pages 59 and 97.
