3 Exporter Defined Product Description

An enhancement has been made to the EXDOC application so that the label approval number can be sent in when an exporter description is supplied.

The **RFP Lodge Message** specification should read as follows:

5.2.37 Reason 13 (Lodge): GR11 IMD (Role – Exporter Defined Product Description)

Segment Rule:	Conditional. Must only be present if allowed by the combination of product and destination.
Segment Rule:	Subject to above, optional. If allowed but not present, Certificate Product Description is defaulted to the description generated by EXDOC.
Note:	If allowed and present, the exporter supplied Certificate description overrides the description normally generated by EXDOC from the product code, packaging codes and measurements, additional product description, quality qualification, location qualification and label approval number. The product code, packaging codes and measurements are always required to verify eligibility of product for export. However, if Commodity Type is set to M (Meat) ~~or F (Fish)~~, when an exporter description is supplied, the following non-coded components of product definition must not be supplied – additional product description, quality qualification, location qualification ~~and label approval number~~. These components, if relevant to the export, are assumed to be included in the exporter supplied description.

Data Item:	*Name:* Item Description Identification, *Element:* IMD C273/7009
Data Rule:	Must equal UHC (User Defined Certificate).

Data Item:	*Name:* Certificate Product Description, *Element:* IMD C273/7008
Data Rule:	Free format text, must be non-blank.

4 Label Approval Number

An enhancement has been made to the EXDOC application so that the label approval number can be sent in when an exporter description is supplied.

The **RFP Lodge Message** specification should read as follows:

5.2.3.94 Reason 13 (Lodge): GR11 RFF (Role – Label Approval Number)

Segment Rule:	Not allowed if Commodity Type is not set to 'M' (Meat).
~~Segment Rule:~~	~~Subject to above, conditional. Must only be present if the EXDOC generated Certificate description is to be used.~~
Segment Rule:	Subject to above, conditional. Must only be present if allowed by the combination of product and destination.

Data Item:	*Name:* Reference Qualifier, *Element:* RFF C506/1153

Data Rule: Must equal AFF (Marking/Label Reference).

Data Item: *Name:* Label Approval Number, *Element:* RFF C506/1154
Data Rule: Free format text. Must be non-blank.
