## **LIST OF EQUIPMENT AND MATERIALS APPROVED FOR USE AT ESTABLISHMENTS REGISTERED TO PREPARE MEAT AND MEAT PRODUCTS**

**AS AT JULY 2024**

All approvals are subject to proving satisfactory in use under operational conditions.

Industry has been previously advised that equipment and materials approved prior to 1 January 1982 will no longer be acceptable for use on registered establishments.

This is to confirm that this approval is withdrawn, however, all such previously approved equipment and materials presently installed on registered establishments may remain in use during their useful life subject to being maintained to a sanitary standard acceptable to the officer-in-charge of inspection at that establishment concerned.

**In the absence of criteria to cover any specific equipment the following information from the United States of America [Code of Federal Regulations](#) is offered:**

Code of Federal Regulations] [Title 9, Volume 2] [Revised as of January 1, 2008] From the U.S. Code of Federal Regulations [[CITE: 9CFR416.3](#)] TITLE 9 - ANIMALS AND ANIMAL PRODUCTS - CHAPTER III - FOOD SAFETY AND INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE PART 416—SANITATION—Table of Contents Sec. 416.3 Equipment and utensils.

(a) Equipment and utensils used for processing or otherwise handling edible product or ingredients must be of such material and construction to facilitate thorough cleaning and to ensure that their use will not cause the adulteration of product during processing, handling, or storage. Equipment and utensils must be maintained in sanitary condition so as not to adulterate product.

(b) Equipment and utensils must not be constructed, located, or operated in a manner that prevents FSIS inspection program employees from inspecting the equipment or utensils to determine whether they are in sanitary condition.

(c) Receptacles used for storing inedible material must be of such material and construction that their use will not result in the adulteration of any edible product or in the creation of insanitary conditions. Such receptacles must not be used for storing any edible product and must bear conspicuous and distinctive marking to identify permitted uses.
