

I have with submit my objection re. the import of NZ apples!
Years Australia under shalot not enough pests and diseases? why add to it? Our apple growers rip out their trees. The coming industries shut down. Some even go to NZ with their business... of Australia how delightful is that to Bioscience Australia? Importing food from outside Australia? Importing food to our economic health is always dangerous to our cucumber! Spanish cucumbers take Germany Deutschland! 1 Spanish cucumbers are killing, and making people sick. people are filling for free Trade organised by people go much for we do not vote for.
of the WTO we do not vote for its import, Again, I do object to NZ apples, its import, regardless, as stated above.

My name is Edith
