POLICY DETERMINATION

ON THE IMPORTATION OF FRESH GREENHOUSE-GROWN CAPSICUM (PAPRIKA) FRUIT FROM THE REPUBLIC OF KOREA

This is my determination relating to the biosecurity policy for the importation of fresh greenhouse-grown capsicum (paprika) fruit from the Republic of Korea.

The importation of fresh greenhouse-grown capsicum (paprika) fruit from the Republic of Korea may be permitted subject to the *Quarantine Act 1908* and the application of phytosanitary measures as specified in the *Final Import Risk Analysis Report for Fresh Greenhouse-Grown Capsicum (Paprika) Fruit from the Republic of Korea*. These measures are designed to limit quarantine risk to a level which achieves Australia's appropriate level of protection.

This policy is to be taken into account by decision makers when considering import permit applications for fresh greenhouse-grown capsicum (paprika) fruit from the Republic of Korea in accordance with the *Quarantine Act 1908* and *Quarantine Proclamation 1998* as amended.
