

**Sourcing/harvesting restrictions for abalone from Tasmania**

**Update: 16 November 2016**  
**Date of effect: immediate**  
**Previous advice: 14 June 2016**

Key change since the last industry notice of 14 June 2016 is opening of blocks 24B and 24C by the Tasmanian Government Department of Primary Industry Parks Water and Environment (DPIPWE).

The Department of Agriculture and Water Resources is issuing this direction in writing under Order 75 of the Export Control (Fish and Fish Products) Orders 2005, directing export registered establishments to comply with the following sourcing requirements for abalone for export from the below identified catch zones until further notice.

**SOURCING AND EXPORT ELIGIBILITY OF TASMANIAN BLACKLIP ABALONE**

<b>Block</b>	<b>1. Export of Live, chilled and frozen – with viscera</b>	<b>2. Export of chilled and frozen – without viscera</b>	<b>3. Export of canned– without viscera</b>	<b>4. Export of viscera and viscera products</b>
<b>15</b>	NO	NO	NO	NO
<b>25</b>	NO	NO	NO	NO
<b>26A</b>	NO	NO	NO	NO
<b>30B</b>	NO	NO	NO	NO
<b>30C</b>	NO	NO	NO	NO
<b>*All other blocks</b>	YES	YES	YES	YES

*\* providing blocks are open in accordance with fisheries regulations*

The export of live, chilled and frozen abalone with or without viscera, and the export of viscera and viscera products and canned products are permitted for all areas except abalone from the blocks listed in the table above.

**NOTE:** To support all Declarations of Compliance, block numbers where abalone have been sourced must be recorded to demonstrate traceability. In addition, an additional declaration is required on the transfer certificate: *‘The abalone or abalone products in this consignment were not sourced from an area affected by paralytic shellfish toxin.’*
