

Notice to Industry
25 May 2016

37/2016

Changes to import conditions and import permits

Who does this notice affect?

This notice applies to importers and agents.

With the commencement of the new [Biosecurity Act 2015](#) on 16 June 2016, importers are advised of upcoming changes to import conditions and permits, and reminded of the need for an import permit on the arrival of goods in Australia. If you intend to import goods into Australia you must comply with the new legislation and read this notice.

What is changing?

Changes to goods requiring an import permit

Some selected goods do not require an import permit if importers can meet specified import conditions in [BICON](#) as an alternative to requiring an import permit.

- The Department has increased the number of selected goods or classes of goods that can enter Australia without an import permit under conditions specified in [BICON](#).
- Goods affected include selected plant products, animal feed, peat, machinery and tyres, as detailed in the table at the end of this notice and in the attached provisional list of fresh produce.
- From 16 June, 2016:
 - [BICON](#) cases for these selected goods will remove the requirement for an import permit; and
 - Importers of these goods will no longer require an import permit. However you will need to ensure the import conditions and requirements in [BICON](#) are met.
- Prior to 16 June 2016, importers will require an import permit for these goods under the *Quarantine Proclamation 1998*.

The aim of the new arrangements is to provide a more flexible risk-based approach to compliance which will assist with reducing costs and the regulatory burden to importers.

Goods with changed import conditions

Import conditions have changed for these goods from 16 June 2016:

- Veterinary therapeutics and medicines; additional biological materials have been added to the list of Approved Ingredients.
- Cosmetics for animals (e.g. shampoos) will be subject to the same regulatory framework as that applied to veterinary medicines.
- Mined fertiliser in bags of 100kg or less will require an import permit.

Import conditions

All conditionally non-prohibited goods entering Australia must meet specified import conditions and requirements as detailed in Department's online Biosecurity Import Conditions system [BICON](#).

- Under the [Biosecurity Act 2015](#) import conditions remain the same for most goods as for the *Quarantine Proclamation 1998*.
- [BICON](#) remains the primary source of information on biosecurity import conditions.
- Importers should check [BICON](#) regularly and register to receive alerts about import conditions for their relevant goods.

Import permits

- Where [BICON](#) specifies that an import permit is required, importers must obtain their import permit prior to the goods landing in Australia.
- Applications for import permits are made via the Department's online Biosecurity Import Conditions system [BICON](#).
- Importers can apply for import permits in advance and post-date it if necessary.

More information

The [Biosecurity \(Prohibited and Conditionally Non-prohibited Goods\) Determination 2016](#) provides specified goods or specified classes of goods that are prohibited or conditionally non-prohibited for the purpose of the *Biosecurity Act 2015*. The Determination replaces the prohibitions and import permit requirements for imported goods under the *Quarantine Proclamation 1998*.

Table: Goods no longer requiring an import permit when specified import conditions are met

<p>Used machinery & tyres</p> <p>Used tyres on rims and off rims</p> <p>Used machinery and equipment (other than beekeeping and veterinary equipment)</p> <p>Animal feeds</p> <p>Retorted (e.g. canned) pet food containing ingredients derived from ruminants that originated from Australia and New Zealand only and that are exported from New Zealand</p> <p>Dead cephalopods - octopus, squid, cuttlefish</p> <p>Cuttlefish bone for pet food use</p> <p>Peat</p> <p>Peat – black peat, peat moss, sphagnum peat moss, white peat</p> <p>Coir peat</p> <p>Dried plant material</p> <p><i>Baecka frutescens</i> dried plant material, for use in thatching, fencing and screening, grown in the USA (other than California, Florida or Hawaii) or another country where the pathogen <i>Puccinia psidii</i> (guava or eucalyptus rust) is known not to occur</p> <p>Potpourri</p> <p>Selected fresh fruit, vegetables, fungi and herbs</p> <p>See attached list of fresh produce</p>	<p>Plant products</p> <p>Almond nuts or kernels (<i>Prunus amygdalus</i> or <i>P. dulcis</i>) for human consumption</p> <p>Chestnuts (<i>Castanea</i> spp.) grown and produced in New Zealand for human consumption</p> <p>Corn or maize grits grown and produced in New Zealand for processing</p> <p>Dried hops (<i>Humulus lupulus</i>) grown and produced in New Zealand for processing</p> <p>Green coffee beans for processing</p> <p>Kibbled cereal mix grown and produced in New Zealand for human consumption</p> <p>Gulong tribute rice/millet for human consumption</p> <p>Semi-processed plant products</p> <p>Onions or shallot bulbs grown and produced in China for human consumption</p> <p>Pineapples grown and produced in Bolivia or Brazil for human consumption</p> <p>Garlic grown and produced in China for human consumption</p> <p>Pomelo as chilled pulp or segments grown and produced in Thailand for human consumption</p> <p>Durian as chilled pulp or segments grown and produced in Malaysia or Thailand for human consumption.</p>
--	---

Provisional list of fresh produce that will no longer require an import permit from 16 June 2016

Under the *Biosecurity (Prohibited and Conditionally Non-prohibited Goods) Determination 2016*, the following provisional list of fresh produce will no longer require an import permit from 16 June 2016 provided that set import conditions are met. All import conditions are found in the Australian Biosecurity Import Conditions ([BICON](#)) system and must be complied with. On 16 June 2016, import conditions in BICON will be updated and should be used to determine which commodities require import permits.

<u>Common name</u>	<u>Scientific name</u>	<u>Permitted form</u>	<u>Permitted from</u>
Allium flowers	<i>Allium</i> spp.	Flowers	All countries
Angelica	<i>Angelica archangelica</i>	Leaves and stems	New Zealand
Apples	<i>Malus domestica</i>	<i>n/a</i>	New Zealand, People's Republic of China (Hebei, Shandong, Shaanxi and Shanxi provinces only)
Apples	<i>Malus domestica</i> 'Fuji'	<i>n/a</i>	Japan
Apricots	<i>Prunus armeniaca</i>	<i>n/a</i>	New Zealand
Asparagus	<i>Asparagus officinalis</i>	<i>n/a</i>	All countries
Avocado	<i>Persea americana</i>	Must be seedless (parthenocarpic) from United States of America	New Zealand, Norfolk Island, United States of America
Babaco	<i>Carica pentagona</i> (syn. <i>Carica pubescens</i> , <i>Carica stipulata</i>)	<i>n/a</i>	New Zealand
Bael leaves	<i>Aegle marmelos</i>	Leaves	American Samoa, Cook Islands, Federated States of Micronesia, Fiji, French Polynesia, Guam, Kingdom of Tonga, Marshall Islands, New Caledonia, New Zealand, Niue, Northern Mariana Islands, Palau, Papua New Guinea, Pitcairn Island, Republic of Kiribati, Republic of Nauru, Samoa (Western), Solomon Islands, Tokelau, Tuvalu, Vanuatu, Wallis and Futuna Islands
Balsam pear (Bitter gourd)	<i>Momordica charantia</i>	<i>n/a</i>	New Zealand, United States of America (all states except Hawaii)
Basil	<i>Ocimum basilicum</i>	Leaves and stems	New Zealand
Bay leaves	<i>Laurus nobilis</i>	Leaves	New Zealand
Beetroot	<i>Beta vulgaris</i> var. <i>conditiva</i>	Must be topped (leaf bases and growing point removed) and tailed	New Zealand

NOTE: This list is a guide only and is not intended for use after 16 June 2016.
