## Notes

- 1) This monthly Volume Weight Average Price (VWAP) has been calculated in line with Aither's calculation methodology which is available upon request.
- 2) Only trades reported in June 2019 are included in this calculation.
- 3) The 'Number of Transfers and 'Volume of Transfers' (ML) are calculated based on all trades from state water market registers, including \$0 value trades. This is in line with Aither's calculation methodology which is available upon request.
- 4) This figure has been determined by taking the total monthly volume of transfers and dividing by the total number of transfers of the given entitlement during the month in question.
- 5) As trade prices within NSW Murray Irrigation GS are not reported Aither has presented NSW Murray GS on river prices instead given the common characteristics that these entitlements share.
